Motorbooks Workshop

The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been "more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.

Labor Relations Reference Manual

An American Workhorse Inventor Jerome Increase Case founded Case in Racine in 1842 to build threshing machines. It was a humble beginning for a company that would eventually become the first builder of steam engines for agricultural use, and eventually emerge as the world's largest maker of steam engines. In 150 years of J.I. Case, farm equipment expert and historian C.H. Wendel chronicles all the developments, innovations, and history that have made the Case name a giant in the world of farming. With more than 2,000 story-telling photos and exhaustive research, Wendel covers every model ever produced by J.I. Case, over a 150-year period, from the earliest steam-powered vehicles to the new generation of multi-purpose wonders.
