Clinical Dermatology John Wiley & Sons

One of the most ambitious texts to be published in dermatology for some years, this is a comprehensive guide to dermatologic conditions, classified by physical findings, and referenced to current literature. There are 284 entries, arranged alphabetically. The art and science of clinical dermatology rest with the ability of the clinician to formulate an appropriate differential diagnosis by defining and synthesizing the physical findings; this book serves as a guide in that quest, and will be both educational and stimulating to dermatologists at all levels of training and practice.

ABC of Dermatology McGraw-Hill

Evidence-based Dermatology, Second Edition is a unique book in the field of clinical dermatology. Written and edited by some of the world's leading experts in evidence-based dermatology, it takes a highly evidence-based approach to the treatment of all major and many of the less common skin conditions. The toolbox at the beginning of the book explaining how to critically appraise different studies, along with the comprehensive reviewing and appraisal of evidence in the clinical chapters makes this book distinctive in its field as do the treatment recommendations which are based on the discussion of the best available evidence using a question-driven approach and a common structure on dealing with efficacy, drawbacks and implications for clinical practice.

Fitzpatrick's Dermatology, 9e Springer

A comprehensive single-volume text on clinical dermatology Featuring a strong focus on diagnosis and treatment, Clinical Dermatology is a concise yet thorough guide to 100 of the most common dermatologic conditions. This latest addition to the LANGE Clinical series is enriched by a full-color presentation and a logical, easy-to-use organization. More than 250 full-color illustrations Divided into three sections: Fundamentals of Diagnosis and Treatment, Common Skin Diseases, and Problem Based Dermatology (which includes cases) "Pearls" and "Pitfalls" throughout the text

Atlas of Clinical Dermatology Lippincott Williams & Wilkins

This book is a comprehensive but compact guide to the latest technical and technological developments in the growing field of non-invasive diagnosis in clinical dermatology. Information is provided on the practical and technical characteristics of a wide range of equipment and methods for in vivo measurements that aid in the investigation of skin function, the evaluation of topically applied products and the monitoring of skin disease. Individual sections are devoted to imaging techniques, skin analysis, superficial skin analysis, skin mechanics, water and stratum corneum hydration and erythema and blood flow. All of the authors are experts in the field, with detailed knowledge of the techniques they describe. Non-Invasive Diagnostic Techniques in Clinical Dermatology will be of value for all dermatologists, whether they are engaged in delivering patient care or in research programs, for cosmetic scientists and for biologists involved in skin research and product assessment.

Discusses new and emerging viruses including Zika and human polyomaviruses.

Fitzpatrick's Color Atlas and Synopsis of Clinical Dermatology McGraw-Hill Professional Publishing

Each dermatologist that was board certified after 1992 is required by the American Board of Dermatology to take a recertification exam every ten years. One of the major components of the exam is to be able to identify clinical photographs of approximately 200 skin diseases, and while there are other components to the test, they vary according to subspecialty. However, everyone is required to identify the images, so several months before the exam, the American Board of Dermatology releases a list of the skin diseases that will be tested, but does not provide the images or reveal which ones will appear. Review of Clinical Conditions for the Dermatology Recertification Examination provides a thorough, concise review of clinical images of the specific conditions that the reader will be required to recognize during the American Board of Dermatology recertification test. In addition, concise key clinical features for each image will be provided that will assist the reader in recognizing the clinical images on the examination, enabling them a more efficient way to study for the test without having to look up images online or in a large text book. Written by a board certified dermatologic surgeon who recently took the recertification exam, this book proves indispensable to dermatologists taking the exam or residents who want a quick reference of the clinical appearances of the main conditions generally encountered by a dermatologist.??

Textbook of Pediatric Dermatology Elsevier Health Sciences

Dermatology, edited by world authorities Jean L. Bologna, MD, Joseph L. Jorizzo, MD, and Julie V. Schaffer, MD, is an all-encompassing medical reference book that puts the latest practices in dermatologic diagnosis and treatment at your fingertips. Whether you’re a resident or an experienced practitioner, you’ll have the in-depth, expert, up-to-the-minute answers you need to overcome any challenge you face in practice. Find answers fast with a highly user-friendly, "easy-in-easy-out" format and a wealth of tables and algorithms for instant visual comprehension. Get full exposure to core knowledge with coverage of dermatology’s entire spectrum of subspecialties. See just the essential information with "need-to-know" basic science information and key references. Expedite decision making and clarify complex concepts with logical tables, digestible artwork, and easy-to-grasp schematics. Visualize more of the conditions you see in practice with over 3500 illustrations, of which over 1,400 are new: 1,039 clinical images, 398 pathology slides, and 152 schematics. Stay at the forefront of your field with updated treatment methods throughout, as well as an increased focus on patients with skin of color. Get an enhanced understanding of the foundations of dermatology in pathology, the clinical setting, and dermoscopy with a completely rewritten introductory chapter. Better comprehend the clinical-pathological relationship of skin disease with increased histologic coverage. Bologna’s Dermatology is the ultimate multimedia reference for residents in training AND the experienced practitioner.

Andrews' Diseases of the Skin CRC Press

This best selling text has been completely revised and refreshed in the fourth edition. The authors aim to enthuse family doctors (for whom they are primarily writing) to enjoy the challenge of diagnosing and treating skin conditions. Clinical Dermatology contains over 500 high quality pictures and diagrams matched with many colourful phrases to illustrate and entertain as it teaches. It has established a reputation as a ‘way of learning’ and as a cogent overview of the subject for the aspiring specialist. Readers are guided through the maze that too often lies between the presenting skin complaint and its final diagnosis and treatment. The authors have created an easily read text with enough detail to clarify the subject but not enough to obscure it. This fourth edition contains new chapters on racially pigmented skin, dermatology of different age groups and cosmetic dermatology. Relevant internet sites are now clearly highlighted at the end of each chapter and the comprehensive formulary has been updated.
