Physical Education is a core component of the primary school curriculum. The primary years are perhaps the most significant period for motor development in children, a time during which basic movement competencies are developed and which offers the first opportunity for embedding physical activity as part of a healthy lifestyle. This is the first comprehensive introduction to the teaching of PE in the primary school to be written exclusively by primary PE specialists, with primary school teaching experience. The book highlights the importance of PE in the primary curriculum and the key issues facing primary teachers today, such as inclusion, training needs and the development of creativity. Central to the book are core chapters that examine each functional area common to many primary PE syllabi – including games, dance, gymnastics, athletics and outdoor learning – and give clear, practical guidance on how to teach each topic. Rooted throughout in sound theory and the latest evidence and research, this book is essential reading for all students, trainee teachers and qualified teachers looking to understand and develop their professional practice in primary Physical Education.

As it stands, there is currently a void in education literature in how to best prepare preservice teachers to meet the needs of individualized learners across multiple learning platforms, social/economical contexts, language variety, and special education needs. The subject is in dire need of support for the ongoing improvement of administrative, clinical, diagnostic, and instructional practices related to the learning process. The *Handbook of Research on Reconceptualizing Preservice Teacher Preparation in Literacy Education* stimulates the professional development of preservice and inservice literacy educators and researchers. This book also promotes the excellence in preservice and inservice literacy both nationally and internationally. Discussing topics such as virtual classrooms, critical literacy, and teacher preparation, this book serves as an ideal resource for tenure-track faculty in literacy education, clinical faculty, field supervisors who work with preservice teacher educators, community college faculty, university faculty who are in the midst of reconceptualizing undergraduate teacher education curriculum, mentor teachers working with preservice teachers, district personnel, researchers, students, and curricula developers who wish to understand the needs of preservice teacher education.

*Emotions in Second Language Teaching* Allyn & Bacon

This book is open access under a CC BY 4.0 license. This book explores how the socially disputed period of the Cold War is remembered in today's history classroom. Applying a diverse set of methodological strategies, the authors map the dividing lines in and between memory cultures across the globe, paying special attention to the impact the crisis-driven age of our present has on images of the past. Authors analysing educational media point to ambivalence, vagueness and contradictions in textbook narratives understood to be echoes of societal and academic controversies. Others focus on teachers and the history classroom, showing how unresolved political issues create tensions in history education. They render visible how teachers struggle to handle these challenges by pretending that what they do is ' just history ' . The contributions to this book unveil how teachers, backgrounding the political inherent in all memory practices, often nourish the illusion that the history in which they are engaged is all about addressing the past with a reflexive and disciplined approach.

Despite the common association between authenticity and motivation in language learning, there does not currently exist a single volume exploring these connections. This book looks at the relationship between authenticity and motivation by specifically viewing the process of mutually validating the act of learning as social authentication, which in turn can often lead to positive motivational synergy between students and teacher(s). The study at the centre of this book uses autoethnography and practitioner research to examine the complex relationship between authenticity and motivation in the foreign language learning classroom. In particular, it traces the links between student and teacher motivation, and proposes that authenticity can act as a bridge to connect learners to the classroom environment and engage with the activity of learning.

*Current Topics in Clinical and Community Psychology, Volume 1* reviews advances in clinical and community psychology. Topics covered include theory and research in areas such as psychological assessment of intelligence, personality, and abnormal behavior; psychotherapy, broadly defined to include counseling and behavior modification; and psychophysiological and neurological determinants of personality and psychopathology. Comprised of five chapters, this volume first illustrates how reinforcement and modeling techniques can enable psychologists to function effectively as mental health consultants and agents of social change in an institution for delinquent children. The second chapter describes a unique program designed to prevent emotional dysfunction in school children by combining effective therapeutic intervention with relevant research and evaluation. The third chapter challenges the relevance of psychological research that does not take into account the relationship between the experimenter and his subjects, and instead demonstrates the impact of experimenter self-disclosure on the responses given to psychological tests and on subjects' behavior in psychology experiments. The fourth chapter proposes a behaviorally oriented model for the assessment of positive mental health and describes a successful application of this model in the assessment of the competence of college freshmen. The final chapter relates research on human psychophysiology to problems of psychological assessment and psychotherapy that are of central concern to clinical psychologists. This book should prove useful to practicing clinical and community psychologists, graduate and undergraduate students of psychology, and members of other mental health professions.

This book provides an international perspective on teaching and learning geography in the primary classroom. It describes the essence of primary school geography and identifies the 'big ideas', thereby offering a synthesis of the international geography curricula and classroom profiles against these big ideas. Each chapter discusses current and new research on a set topic, yet a common thread running between chapters is the assessment relevant to that particular topic. By providing a portrait of the central concepts, the essential skills and necessary inquiry processes of a primary geography education, the book will be of interest to education researchers, classroom teachers and the pre-service teacher, curriculum writers and policy writers.
