Continuing Professional Development for Clinical Psychologists John Wiley & Sons  
This handbook provides the Personal, Social and Health Education (PSHE) co-ordinator in a school with everything that they need to deliver good practice in this subject. The book contains thorough guidance through policy and required practice and has a strongly practical bias. It shows through

examples of good practice what can be achieved and how this can generally help to raise standards in schools. This is a topical, lively and up-to-date book which tackles the real issues facing schools, heads, co-ordinators and classroom teachers in an engaging and practical manner. It quotes from examples and case studies where strategies worked, and failed - but also keeps the learning of the pupil as the focus of all activities. The PSHE Co-ordinators Handbook is what every Head and PSHE co-ordinator needs to help them make practical sense of the new curriculum, the new PSHE, the new healthy school standard, social inclusion, citizenship, school councils, and the new Ofsted requirements - and how these can be woven together in a coherent way to support the raising of academic standards.

Therapists must increase their understanding of Continuing Professional Development (CPD) to maintain and improve competence. Every practitioner will need to take steps to maintain and demonstrate continued competence under the provisions of the new Health

Act 1999. This book considers current policy on CPD and discusses the theoretical basis for maintaining competence and for adult learning. Primarily, however, it provides practical guidance on how to develop a strategy for professional and career development, and on portfolio preparation that shows evidence of professional updating and CPD. Many examples are given of activities in the areas of clinical work, management, education and research that can be used for CPD. The development and use of learning skills such as reflection and critical evaluation is considered central to the process. Written specifically with the therapist in mind, this book will provide invaluable practical advice to occupational therapists, physiotherapists, radiographers, speech and language therapists, and podiatrists.

**Leading, Managing and Developing People** McGraw-Hill Education (UK)

This third book in the Information Age book series, International Research on School Leadership, focuses on the changing nature of instructional leadership in the 21st century. Our goal is to examine instructional

---

leadership from multiple educational and international perspectives. Unlike many leadership books that focus on conceptualizations and personal narratives, the seven chapters provide empirical evidence of how instructional leadership is evolving in the 21st century. From the effective schools research of the 1980s to today's relentless calls for improved student performance, attention has focused on the instructional leadership roles and responsibilities of school principals, headteachers, and educational system leaders. The emphasis on student performance has gone global as evidenced by highly-publicized international studies, such as the Trends in International Math and Science Studies (TIMSS) and the Program for International Student Assessment (PISA), comparing student achievement in different countries. These developments have had substantial effects on school leaders, especially building-level principals and headteachers. Rather than being the only ones overseeing school improvement aimed at increasing student learning, many school administrators are distributing leadership responsibilities to other administrators and teachers on their campuses. To fully understand instructional leadership in the 21st century, the book examines three important dimensions of instructional leadership: (1) the current context for turning

around low-performing schools, increasing teacher effectiveness, and providing equitable outcomes for all students, (2) international perspectives of instructional leadership development, particularly the value of teacher coaching and leadership development for aspiring and practicing school leaders in a developing country, and (3) the obstacles instructional leaders confront as they deal with fiscal constraints, political pressure, diverse student populations, and high-stakes standards-based reforms.

This book presents ideas, evidence and guidance for those interested in using the most recent advances in knowledge about learning and human development to enhance medical education's ability to form competent, caring and publicly responsible physicians. It does this by establishing the development of a professional identity in medical students and residents as a primary goal of medical education. This new approach is emerging from experience and experiment by medical educators articulating a new way of understanding their mission. It is an optimistic book - the voices are those of the leaders, theorists and experienced practitioners who have found in this new approach a promising way to confront the challenges of a new era in medicine. It summarizes the theoretical basis of identity formation, outlines our current knowledge of how best to assist

learners as they acquire a professional identity, and addresses the issue of assessment of progress towards this goal. A Guide to Teaching, Parenting and Creating Family Friendly Schools John Wiley & Sons

Continuing professional development (CPD) is essential for all health and social care professionals. It is also beneficial for organisations. Evidence shows that when there is significant investment in CPD, individuals feel valued and their practice improves. In order to maximise the potential of your CPD, this practical handbook guides you through the five TRAMm stages, which are depicted as stations: Tell (T), Record (R), Activity (A), Monitor (M) and measure (m). The tried-and-tested TRAMm model reflects the five standards for CPD laid down by the Health and Care Professions Council; and your own learning needs provide the main focus, enabling you to develop a full CPD portfolio as you progress. At the end of each chapter, there are opportunities to reflect on your learning - and apply theory to practice through a series of tasks. Designed for all levels (from health and social care students to experienced practitioners), this book may also be useful for associated support workers and other healthcare professionals, including doctors, pharmacists, optometrists, nurses and midwives. In addition, some aspects will be relevant for professionals outside healthcare, such as teachers, surveyors and engineers. Above all, this book demonstrates that CPD is closely linked to professional and
