The AF code (Air Flow) on a Cabrio Dryer is signaling that the machine does not have proper airflow. Dryers need to be able to pull in fresh air and expel humidity to be able to dry fabrics. The excessive lint inside the drum shows that the lint is not being drawn into your dryer filter because of the poor circulation of air.

First thing you will want to do is a simple cabrio dryer control board reset, which is done by unplugging the dryer for five minutes then plugging it back in. That will reset the board and put it back in standby mode. If the dryer continues to give you the same error then the only way to fix it is to replace the control board.
