Every man had a dream of the kind of man they would one day become. Have you become this man? Have you ever asked another man whether he has become who he always wanted to be? I'm surprised to find that for so many men their earliest dreams for themselves are just a hope for the future. This book is for men, and for everyone who cares about them. We give up our dreams too easily. Our personal growth stops. What we don't know is that we're missing the connection of full emotional intimacy. Many of us haven't been taught how to create that emotional intimacy and how to distinguish it from sexual intimacy.

Without emotional intimacy and joy, men aren't fully alive. What a tragedy that so many men are missing so much. The hope that motivated this book is that someday, all men will be able to reconnect with lasting intimacy and joy that they can have with others, by reconnecting with the man they always wanted to be. The vision is that someday our boys will grow into the men they want to be, living out the deepest longings of their hearts. It is my hope that this book will bring you or those around you closer to being the man you always dreamed of becoming.

Reveals how psychedelics can facilitate spiritual development and direct encounters with the sacred • With contributions by Albert Hofmann, Huston Smith, Stanislav Grof, Charles Tart, Alexander "Sasha" Shulgin, Brother David Steindl-Rast, and many others • Includes personal accounts of Walter Pahnke's Good Friday Experiment as well as a 25-year follow-up with its participants • Explores protocols for ceremonial use of psychedelics and the challenges of transforming entheogenic insights into enduring change Modern organized religion is based predominantly on secondary religious experience--we read about others' extraordinary spiritual encounters with God but have no direct experience ourselves. Yet there exist powerful sacraments to help us directly experience the sacred, to help us seek out the meaning of being human and our place in the universe, and to help us see the sacred in the world that surrounds us. In this book, more than 25 spiritual leaders, scientists, and psychedelic visionaries examine how we can return to the primary spiritual encounters at the basis of all religions through the guided use of psychedelics. With contributions by Albert Hofmann, Huston Smith, Stanislav Grof, Charles Tart, Alexander "Sasha" Shulgin, Brother David Steindl-Rast, Myron Stolaroff, and many others, this book explores protocols for ceremonial and

spiritual use of psychedelics, including LSD, psilocybin, ayahuasca, and MDMA, and the challenges of transforming entheogenic insights into enduring change. It examines psychoactive sacraments in the Bible, myths surrounding the use of LSD, and the transformative ayahuasca rituals of Santo Daime. The book also includes personal accounts of Walter Pahnke's Good Friday Experiment as well as a 25-year follow-up with its participants. Dispelling fears of inauthentic spirituality, addiction, and ill-prepared encounters with the holy, this book reveals the potential of psychedelics as catalysts for spiritual development, a path through which faith can directly encounter God's power, and the beginning of a new religious era based on personal spiritual experience.

Clinical Supervision and Professional Development of the Substance Abuse Counselor - TIP 52 DIANE Publishing

Healing Circles: Grieving, Healing, and Bonding with Our Animal Companions, is a guide for those grieving the loss of a cherished pet, as well as a celebration of the healing bond between people and their animals. This book contains practical suggestions for working through pet grief, along with accounts of how other people have experienced loss, healing, and bonding. Joy Davy, a Licensed Clinical Professional Counselor with a special focus on Pet Grief, offers insights into the depth of the human-animal bond, as well as ways to grow

through the pain of bereavement. The intense pain we may experience after the death of a pet is called a "disenfranchised grief," meaning it is a grief that society does not recognize. Healing Circles gives reassurance and comfort, and offers the words to teach others to respect your loss. You will find a guided imagery for re-connecting with your pet and some ideas for memorializing the bond. You will find an exploration of how children and your other pets may experience grief, and how to help them, and a discussion of when to consider bringing another animal companion home, and how to create a loving bond with that pet. Throughout this book, you will see examples of how animals heal us, and how we heal them, as well. Our bonds with animals are uncomplicated by grudges, criticisms or judgments. Many people today find that their greatest emotional support comes from their pets. We are more stressed than ever before. We are nutritionally impoverished, sleep-deprived, frazzled from over-scheduling and trying to multi-task. The human beings we love may not be present for us, because they are on their smart phones. And we may not be present for them, because we are tweeting and posting. Meanwhile, the cat curls herself into a perfect circle on our lap. The dog settles in next to us, nuzzling our arm, leaning against our leg. The animal is the only one who comes to find us in the blazing, buzzing, electronics-filled house. And we feel accompanied on our solitary path; we feel deeply loved; we love in return. Of course we still love our people, too. But it's the companion animal who values us enough to give us warmth and time. This meets our very deep

need for connection. We appreciate that. And so, we bond. There is the pet-who-completes-a-family, the sibling-pet, the once-in-a-lifetime pet, among many other types of bonds that we create. These relationships enrich us beyond measure. Our pets' lives are short, however, and those of us who dare to love will have to face the loss that inevitably follows. This book is a guide through the dark path of pet grief, but it is also a joyful celebration of the beautiful bonds that people and animals create with each other. Healing Circles is an indispensable guide for every animal lover.

In recent years, with the introduction of new molecules into the arsenal of psychiatric therapy, the historical significance of classical psychotropic drugs to modern society has been lost. Keep in mind that its modern history is very short, born in the 1950s with the introduction of lithium, chlorpromazine, and imipramine, known as the "revolution of psychopharmacology." The purpose of this work is to review how psychoactive substances have been discovered, developed, and applied over
