Healing Circles: Grieving, Healing, and Bonding with Our Animal Companions, is a guide for those grieving the loss of a cherished pet, as well as a celebration of the healing bond between people and their animals. This book contains practical suggestions for working through pet grief, along with accounts of how other people have experienced loss, healing, and bonding. Joy Davy, a Licensed Clinical Professional Counselor with a special focus on Pet Grief, offers insights into the depth of the human-animal bond, as well as ways to grow through the pain of bereavement. The intense pain we may experience after the death of a pet is called a "disenfranchised grief," meaning it is a grief that society does not recognize. Healing Circles gives reassurance and comfort, and offers the words to teach others to respect your loss. You will find a guided imagery for reconnecting with your pet and some ideas for memorializing the bond. You will find an exploration of how children and your other pets may experience grief, and how to help them, and a discussion of when to consider bringing another animal companion home, and how to create a loving bond with that pet. Throughout this book, you will see examples of how animals heal us, and how we heal them, as well. Our bonds with animals are uncomplicated by grudges, criticisms or judgments. Many people today find that their greatest emotional support comes from their pets. We are more stressed than ever before. We are nutritionally

---

impoverished, sleep-deprived, frazzled from over-scheduling and trying to multi-task. The human beings we love may not be present for us, because they are on their smart phones. And we may not be present for them, because we are tweeting and posting. Meanwhile, the cat curls herself into a perfect circle on our lap. The dog settles in next to us, nuzzling our arm, leaning against our leg. The animal is the only one who comes to find us in the blazing, buzzing, electronics-filled house. And we feel accompanied on our solitary path; we feel deeply loved; we love in return. Of course we still love our people, too. But it's the companion animal who values us enough to give us warmth and time. This meets our very deep need for connection. We

appreciate that. And so, we bond. There is the pet-who-completes-a-family, the sibling-pet, the once-in-a-lifetime pet, among many other types of bonds that we create. These relationships enrich us beyond measure. Our pets' lives are short, however, and those of us who dare to love will have to face the loss that inevitably follows. This book is a guide through the dark path of pet grief, but it is also a joyful celebration of the beautiful bonds that people and animals create with each other. *Healing Circles* is an indispensable guide for every animal lover.

Most people believe that anger is a negative emotion from which no good can come. Many Christians think that anger should not be expressed and that such feelings are sinful. This book (now in it's third printing - 2014) explores the emotion of anger and how anger - which is a part of the human experience - is a force God can use for His purposes. Co-authors Lynette Hoy and Ted Griffin present a fresh approach to managing anger,

identifying the problem, power and process of anger (from annoyance to bitterness or rage); biblical examples of "good anger" and how faith, assertiveness, problem-solving and forgiveness impact anger and can be used by God for his purposes. Chronic anger can be costly - physically, emotionally and relationally. Most people can use their anger in appropriate ways in some situations, and yet can be ineffectual or harmful in other situations. Applying principles from the What's Good About Anger? book and workbooks can reduce your levels of anger, and help you learn effective coping behaviors to stop escalation and to resolve conflicts. Logging anger, triggering situations and applying new skills will help you more effectively control unhealthy anger responses. Ebook available! "Whether you are entering the field of addictions counseling or are a counselor who wants to be prepared for the screening, assessment, and treatment of addiction in your practice, this text provides a foundational basis. Foundations of Addictions Counseling addresses real-life clinical concerns while providing the

---

necessary information to keep up to date with trends. It also addresses the evolving standards of professional organizations, accrediting bodies, licensure boards, and graduate programs and departments. Counselors in school, mental health, rehabilitation, hospital, private practice, and a variety of other settings must be thoroughly prepared to support clients in their quest to be healthy and unimpaired. As the addictions profession has matured, more and more emphasis has been placed on the importance of preparing counselors to work holistically and synthesize knowledge domains from mental health, developmental, and addiction perspectives. The authors provide this knowledge in support of your work on behalf of various clients and

diverse communities. Counselors can expect some of their clients to want to address concerns connected with the use of substances and the development of addictive behavior. This book draws on the specialized knowledge for each contributed chapter. It is written for use in graduate-level preparation programs for counselors. Because of the clarity of the writing and the use of case studies, it may also be adopted in some undergraduate and community college courses. Requirements of the Council for the Accreditation of Counseling and Related Educational Programs (CACREP) and other certification associations have led most university programs in counselor education to require an addictions course for all students, regardless of specialization

---

(school, community, rehabilitation, couples, marriage and family, student personnel, etc.). Addictions counseling is also being offered for CADC I and II certifications, which require undergraduate coursework related to addictions counseling. The book is designed for students taking a preliminary course in addictions counseling. It presents a comprehensive overview of the foundations of addictions counseling, the skills and techniques needed for addictions counseling, and addictions counseling in specific settings. As editors, we know that one text cannot adequately address all the complex and holistic factors involved in assisting clients who present with issues related to addictive behavior. We have, however, attempted to provide our readers with a

broad perspective based on current professional literature and the rapidly changing world we live in at this juncture of the new millennium. The following overview highlights the major features of the text"--

"Since our last edition, much has changed in our world. We've lived through and continue to negotiate the consequences of a pandemic, the impact of significant political polarization, racial unrest, gun violence as well as an increase in drug overdoses. These are significant changes in our society which have forced us to examine our approach to clients in need of mental health and addiction services. The use of teletherapy significantly increased during the peak years of the pandemic and continues to be a

viable option for clients. The increase in overdoses during the pandemic necessitated the utilization of teletherapy. Access to addiction treatment was limited and face-to-face attendance at support meetings moved to a virtual platform. The need for mental health and addiction services has significantly increased since our last edition and it is our hope this revised text will contribute to the education and training of counselors in order to meet those needs"--

In recent years, with the introduction of new molecules into the arsenal of psychiatric therapy, the historical significance of classical psychotropic drugs to modern society has been lost. Keep in mind that its modern history is very short, born in the 1950s with the introduction of lithium, chlorpromazine, and imipramine, known as the "revolution of psychopharmacology." The purpose of this work is to review how psychoactive substances have been discovered, developed, and applied over the millennia. The text presents the drugs that are used in medicine, their origins, the principles of biological theories of mental
