The Complexity Crisis Haynes Publishing

"This pioneering study of United States direct investment in Japan will interest academic specialists, business managers, and government policymakers in America, Japan, and elsewhere. Drawing on rich historical materials from both sides of the Pacific, including corporate records and government documents never before made public, Mason examines the development of both Japanese policy towards foreign investment and the strategic responses of American corporations. This history is related in part through original case studies of Coca-Cola, Dow Chemical, Ford, General Motors, International Business Machines, Motorola, Otis Elevator, Texas Instruments, Western Electric, and Victor Talking Machine. The book seeks to explain why a little foreign direct investment has entered modern Japan. In contrast to the widely held view that emphasizes an alleged lack of effort on the part of foreign corporations, this study finds that Japanese restrictions merit greater attention. Many analysts of the modern Japanese political economy identify the Japanese government as the key actor in initiating such restrictions.

Mason finds that the influence of Japanese business has often proved more potent than these analysts suggest. This book offers fresh insights into both the operation of the modern Japanese political economy and of its relations with the world economy."

A Passion for Ideas John Wiley & Sons

The Yugo Penguin

Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got *The Yugo: The Rise and Fall of the Worst Car in History*. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that

became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.
