The New York Times bestselling author of Bitter Brew chronicles the birth and rise to greatness of the American auto industry through the remarkable life of Harley Earl, an eccentric six-foot-five, stuttering visionary who dropped out of college and went on to invent the profession of automobile styling, thereby revolutionized the way cars were made, marketed, and even imagined. Harleys Earl ' s story qualifies as a bona fide American family saga. It began in the

Michigan pine forest in the years after the Civil War, traveled across the Great Plains on the wooden wheels of a covered wagon, and eventually settled in a dirt road village named Hollywood, California, where young Harley took the skills he learned working in his father ' s carriage shop and applied them to designing sleek, racy-looking automobile bodies for the fast crowd in the burgeoning silent movie business. As the 1920s roared with the sound of mass manufacturing, Harley returned to Michigan, where, at GM ' s invitation, he introduced art into the rigid mechanics of auto-making. Over the next thirty years, he functioned as a kind of combination Steve Jobs and Tom Ford of his time, redefining the form and function of the country ' s premier product. His impact was profound. When he retired as GM ' s VP of Styling in 1958, Detroit reigned as the manufacturing capitol of the world and General Motors ranked as the most successful company in the history of business. Knoedelseder tells the story in ways both large and small, weaving the history of the company with the history of Detroit and the Earl family as Fins examines the effect of the automobile on America ' s economy, culture, and national psyche.

The tail fin era is one of the most recognized in automotive styling, and the influence spread worldwide. As everyone knows, designer Harley Earl took his inspiration from World War II fighter aircraft and the fins grew bolder and larger as competing manufacturers jumped on the bandwagon to produce the most striking vehicle, until they became almost outrageous and turned people off, and then became less prominent again through the 1960s. Cadillac: The Tail Fin Years, takes an in-depth look at the years from 1948 to 1964. A

chapter is devoted to each model year and provides unique facts and features, historical information, specifications, production numbers, options, prices, and more. And of course, the real heart of the book is the many colorful illustrations drawn from the exciting original sales and marketing materials, original factory photos, and examples of well-preserved originals still around today. Often the models featured are those that we all wish we had! Also featured are the famous jewelry ads through this special era in automotive history.
