"Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability.

Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a clichê in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health.

Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, the volume will be of interest to scholars from a number of disciplines including anthropology, gender studies, African studies, psychology and global health"--

When Ducati's great engineer Fabio Taglioni

designed the 750 Ducati in 1970 there was no way he could comprehend how important this model would be. His design was unlike any other before or since: a 90-degree V-twin with single overhead camshafts driven by a train of bevel gears. Taglioni soon developed his 750 into a Formula 750 racer, and in 1972 beat the rest of what the world had to offer at the Imola 200. With this victory, the desmodromic 750 became a legend. Ducati responded by producing a hand-built limited production desmodromic Super Sport. They also continued to produce the touring 750 GT and sporting 750 Sport until legislation killed them at the end of 1974. Today, this triumvirate of 750s represents the end of an era; the era before cost accounting and government design requirements. These were amongst the last pure, unadulterated sporting motorcycles built and it is not surprising they have inspired a new generation of retro classics, the Sport Classic of 2005 and 2006. Author Ian Falloon is a Ducati expert with several books on the marque including the best-selling *The Ducati Story*, and *Ducati Twins Restoration Guide*. He has owned several

750s over the years and has a particular enthusiasm for this model, still owning the 750 Super Sport he bought back in the 1970s.

Antoine of Oregon : A Story of the Oregon Trail The author of this series of stories for children has endeavored simply to show why and how the descendants of the early colonists fought their way through the wilderness in search of new homes. The several narratives deal with the struggles of those adventurous people who forced their way westward, ever westward, whether in hope of gain or in answer to "the call of the wild," and who, in so doing, wrote their names with their blood across this country of ours from the Ohio to the Columbia. To excite in the hearts of the young people of this land a desire to know more regarding the building up of this great nation, and at the same time to entertain in such a manner as may stimulate to noble deeds, is the real aim of these stories. In them there is nothing of romance, but only a careful, truthful record of the part played by children in the great battles with those forces, human as well as natural, which, for so long a time, held a vast 4 portion of this broad land against the advance of home seekers. With the knowledge of what has been done by our own people in our own land, surely there is no reason why one should resort to fiction in order to depict scenes of heroism, daring, and sublime disregard of suffering in nearly every form.

The current situation in sport reveals a large deficit concerning concepts for future developments and projects. Many traditional values, ethical standards and educational ideals are losing their significance - in particular for the young generation. In contrast, commercial media sport as well as international top sport stand to gain from the changing rating of sport in our society. On the other hand, matters of fitness, health and of general wellness are firmly grounded in the daily

routine of the population. The gap in the development of sport is widening. What answers, concepts or problem-solving does a science, which deals with these topics, come up with? These are the guidelines of the "Club of Cologne", which is trying to suggest perspectives by means of active research and subsequent publications, to present models and strategies, and to enrich public discussion by offering approaches or solutions.

Industriali e banchieri, servitori delle istituzioni e accademici, uomini dello spettacolo e della cultura, umanisti e scienziati, laici e cattolici. Personaggi noti, colti nei loro lati più inediti, e personalità che, invece, in pochi conoscono. In questo libro Paolo Bricco ha costruito una galleria di ritratti che

permette di andare al cuore delle persone e che consente di capire che cosa sia oggi il cuore dell'Italia. Ognuno di loro ha una storia di successi e di fallimenti, di paure e di speranze, di dolori e di felicità, di passato e di futuro. Tutti questi ritratti compongono la storia corale di un'Italia impegnata in un'eterna transizione e sempre in bilico fra declino e trasformazione. Un Paese qualche volta feroce prima di tutto verso se stesso, ma non di rado caratterizzato da slanci di generosità verso gli altri. Un Paese meno centrale e importante di un tempo, in una crisi profonda, ma ancora animato da una vitalità e da una capacità di mutare pelle che sono lo specifico dell'enigma italiano.
