A critical challenge for urban charter/autonomous/independent schools is finding educational leaders with the courage to lead with authenticity; integrity and ingenuity using standards based practices to effect transformational change within schools. Two decades after the first charter school opened, leaders still continue to face a range of challenges that traditional public school leaders do not face. Without the type of district support that traditional public school leaders benefit from, charter/autonomous leaders must be able to prepare themselves by tapping into alternative resources quickly and efficiently. This book begins by cultivating the balance of self, both personal and professional, that will guide leaders to manage the operational and educational demands of leading a charter/autonomous school. With a didactic approach identifying skills and capacities needed above and beyond the Interstate School Leaders Licensure Consortium Standards (ISLLC), this book will give administrators the requisite skills and necessary tools to effectively manage the complexities of leadership in urban charter/autonomous schools.

In fact, grades and attendance matter more than test scores, race, poverty, or other background characteristics for later academic success. This report follows approximately 20,000 Chicago Public Schools students as they transition from elementary to high school. It is designed to help answer questions about which markers should be used to gauge whether students are ready to succeed in high school and beyond. It is now time to break down the ideology of exceptionalism in the United States and other Anglo-American nations if we are to develop reforms that will truly inspire our teachers to improve learning for all our students especially those who struggle the most. In that essential quest, Pasi Sahlberg is undoubtedly one of the very best teachers of all. From the Foreword by Andy Hargreaves, Lynch School of Education, Boston College *Finnish Lessons* is a first-hand, comprehensive account of how Finland built a world-class education system during the past three decades. The author traces the evolution of

education policies in Finland and highlights how they differ from the United States and other industrialized countries. He shows how rather than relying on competition, choice, and external testing of students, education reforms in Finland focus on professionalizing teachers work, developing instructional leadership in schools, and enhancing trust in teachers and schools.
