NEWLY REVISED and expanded 2016! Becoming a Notary loan signing agent can change your life by offering you a new lucrative career. As an independent contractor, this home-based business adapts to either full-time or part-time hours. Once you become a Notary in your state, all the information and training you need to become a Notary signing agent is in this very detailed and complete home study course / business guide. Over the last several years I've had the pleasure of coaching many new agents in all the important details required by the loan industry. This course and manual is a direct result of that real-time, one-on-one coaching. And once you've completed the course, it becomes a field manual to refer to as often as you need to. I feel very passionate about upholding the integrity of our dual role--that of commissioned

Notary Public and loan signing agent. I hope this training starts you off on a lucrative and fulfilling new career. The industry needs well-trained agents. That's you! Please note: Loan Signing Agent certification is not legally required to perform loan signings. Simply being a commissioned Notary Public is all that is legally needed to notarize any document. However, some title companies and signing agencies now require certification as proof that a notary is familiar and skilled with the process. There is no legal entity governing signing agent courses or certification. Certification only shows that you have taken a course and/or passed a final exam in a particular field of study. It does not imply any type of official or governmental licensing or certification.

The income gap between women and men has gotten lots of attention in the last few decades: today women earn seventy-nine cents for every dollar men earn. But fewer people are aware of the much more serious wealth gap: for every dollar in wealth men own, women own thirty-two cents. Thirty-two cents! Wealth matters. Wealth is what gives us a financial safety net when we lose our jobs, break up a relationship or divorce, we or our dependents become sick, or when we are hit by some other financial crisis. It enables us to build security, to give our children a future, and to retire. It is passed from generation to generation, allowing wealthy families to stay wealthy over time. Wealth can generate income, whether through investments in the financial markets, or real estate, or through funding a startup business, and more. Significant wealth even allows us to influence our world by allowing us to contribute to political campaigns and policy initiatives. For these reasons, wealth is a better indicator of financial status than income: it reveals who is secure and influential and who is not. By treating women and men equally without recognizing the gross social and economic advantages that differentiate us, the law perpetuates the wealth gap. Here, Carla Spivack takes readers through a tour of a woman's life stages and the property laws that may apply and hinder their financial independence. From living together to marriage, from divorce to inheritance, the circumstances invite unfair treatment that leaves women out in the cold. Understanding how to protect your assets,

fight for what is fair, and increase financial security is increasingly important as the wage gap continues to flourish. Readers will learn about the laws that work against them and how to protect themselves regardless of their relationship status. For all women of all ages, here is your guide to keeping your wealth not matter how your relationship fares.

In Arizona, a notary public is a public officer commissioned by the Secretary of State to perform notarial acts, as defined in the Arizona Revised Statutes (see Chapter 5). A notary, in essence, serves as an impartial witness pursuant to A.R.S. § 41-328(B). Government offices, businesses and the public rely on the accuracy and integrity of notaries public. This means the notary should take the required steps to authenticate signatures and ensure that all notarizations are properly completed and performed. Many documents require a notarization in an effort to deter fraud, to prove the authenticity of the signature and to ensure that a signature was made willingly and not under duress. Therefore, it's essential that a notary accept a valid form of identification, as defined in statutes, to determine that a signer is who he or she claims to be. Because the prevention of fraud and deception is central to the notary's role, it is essential that a notary have

no conflict of interest when notarizing a document.

Apostille Handbook : a handbook on the practical operation of the Apostille Convention Rowman & Littlefield Publishers

A notary is a public official responsible for independently verifying signatures and oaths. Depending on how a document is written, a notarization serves to affirm the identity of a signer and the fact that they personally executed their signature. A notarization, or notarial act, officially documents the identity of a party to a document or transaction and the occasion of the signing that others can rely upon, usually at face value. A notary's authentication is intended to be reliable, to avoid the inconvenience of having to locate a signer to have them personally verify their signature, as well as to document the execution of a document perhaps long after the lifetime of the signer and the notary. An oath is a sworn statement. In most cases a person will swear that a written statement, oral statement, or testimony they are about to give is true. A notary can document that the notary administered an oath to an individual.

Historically, Notaries Public predate the Roman empire; their development coincides with that of written and recorded communication. As the ability to read and write was rare, the earliest Notaries Public served primarily as scribes to assist the illiterate. The decline of the Roman empire saw a corresponding reduction in the volume and importance of written communication. It wasn't until the dawning of the Renaissance that Notaries Public were once again called upon to perform important societal functions. Over the centuries, many a great author, poet and historian supplemented their incomes with fees collected from the provision of literacy services. American pioneer history is replete with examples of notarial assistance. Among them: the processing of land or mining claims, the authentication of

public or private documents, and the reading and writing of general correspondence.

In a 2009 study of the debt collection industry, the Commission concluded that the "most significant change in the debt collection business in recent years has been the advent and growth of debt buying." "Debt buying" refers to the sale of debt by creditors or other debt owners to buyers that then attempt to collect the debt or sell it to other buyers. Debt buying can reduce the losses that creditors incur in providing credit, thereby allowing creditors to provide more credit at lower prices. Debt buying, however, also may raise significant consumer protection concerns. The FTC receives more consumer complaints about debt collectors, including debt buyers, than about any other single industry. Many of these complaints appear to have their origins in the quantity

and quality of information that collectors have about debts. In its 2009 study, the Commission expressed concern that debt collectors, including debt buyers, may have insufficient or inaccurate information when they collect on debts, which may result in collectors seeking to recover from the wrong consumer or recover the wrong amount. The FTC initiated this debt buyer study in late 2009 for two main purposes. First, the FTC sought to obtain a better understanding of the debt buying market and the process of buying and selling debt. Second, the Commission wanted to explore the nature and extent of the relationship, if any, between the practice of debt buying and the types of information problems that the FTC has found can occur when debt collectors seek to recover and verify debts. Many stakeholders recognize the concerns that have been raised about debt buying, including consumer groups, members of Congress, federal and state regulatory and enforcement agencies, and the debt buyer industry itself. Indeed, the debt buyer industry has launched a self-regulatory effort to address some of these concerns, and the FTC is encouraged by that effort. This study of debt buyers is the first large-scale empirical assessment of the debt buying sector of the collection industry. The FTC hopes that its findings contribute to a greater understanding of debt buying, enhance ongoing reform efforts, and prompt further study of the industry. To conduct its study, the Commission obtained information about debts and debt buying practices from nine of the largest debt buyers that collectively bought 76.1% of the debt sold in 2008, with six of these debt buyers providing the information the Commission used in most of its analysis. The FTC also considered its prior enforcement and policy work related to debt collection, as well as available research concerning debt buying. The study focused on large debt buyers because they account for most of the debt purchased; it did not address the practices of smaller debt buyers that are a frequent source of consumer protection concerns, a limitation that must be considered in evaluating the study's findings. The Commission acquired and analyzed an unprecedented amount of data from the studied debt buyers, which submitted data on more than

5,000 portfolios, containing nearly 90 million consumer accounts, purchased during the three-year study period. These accounts had a face value of \$143 billion, and the debt buyers spent nearly \$6.5 billion to acquire them. Most portfolios for which debt buyers submitted data were credit card debt, with such debt accounting for 62% of all portfolios and 71% of the total amount that the buyers spent to acquire debts. In addition to these data, the debt buyers provided copies of many purchase and sale agreements between themselves and sellers of debts. The debt buyers also submitted narrative responses to questions concerning their companies and their practices, as well as the debt buying industry. The key findings of the study are as follows:

How to Make Six Figures As a Mobile Notary and Loan Signing Agent Lexis Nexis Hall's illuminating book not only unlocks the mystery surrounding the content of this work of art; it also makes a unique contribution to the fascinating history of betrothal and marriage custom, ritual, and ceremony, tracing their evolution from the late Roman Empire thorough the fifteenth century and providing

persuasive visual evidence for their development.

Greater Than Emperor LexisNexis Is Superman Canadian? Who decides, and what is at stake in such a question? How is the Underground Railroad commemorated differently in Canada and the United States, and can those differences be bridged? How can we acknowledge properly the Canadian labour behind Hollywood filmmaking, and what would that do to our sense of national cinema?

Reading between the Borderlines grapples with these questions and others surrounding the production and consumption of literary, cinematic, musical, visual, and print culture across the Canada-US border. Discussing a range of popular as well as highbrow cultural forms, this collection investigates patterns of cross-border cultural exchange that become visible within a variety of genres, regardless of their place in any arbitrarily devised cultural hierarchy. The essays also consider the many interests served, compromised, or negated by the operations of the transnational economy, the movement of culture's "raw material" across nation-state borders in literal and conceptual terms, and the configuration of a material citizenship attributed to or negotiated around border-crossing cultural objects. Challenging the oversimplification of cultural

products labelled either
"Canadian" or "American,"
Reading between the Borderlines
contends with the
particularities and
complications of North American
cultural exchange, both
historically and in the present.
