A notary is a public official responsible for independently verifying signatures and oaths. Depending on how a document is written, a notarization serves to affirm the identity of a signer and the fact that they personally executed their signature. A notarization, or notarial act, officially documents the identity of a party to a document or transaction and the occasion of the signing that others can rely upon, usually at face value. A notary's authentication is intended to be reliable, to avoid the inconvenience of having to locate a signer to have them personally verify their signature, as well as to document the execution of a document perhaps long after the lifetime of the signer and the notary. An oath is a sworn statement. In most cases a person will swear that a written statement, oral statement, or testimony they are about to give is true. A notary can document that the notary administered an oath to an individual.

Studies of the overall impact of robotics on the economy have shown that investments in its various sectors – industrial, professional and service robotics – are increasing globally and the markets associated with them are valued in billions. Robotization improves the competitiveness of enterprises, while collaborative robotics reinvents methods of production. Beyond the economic outlook, service robotics, backed by the development of artificial intelligence, raises challenging ethical and social issues. The legal analysis of robotics is no mean feat because it covers a very diverse technical reality. Companies whose businesses are focused on robotic technologies and applications can be confronted with a complex legal situation resulting from the plurality of the applicable rules which have not necessarily been conceived or adopted bearing in mind their specific constraints. This situation should not hamper their development. It only implies taking cues from the economic legal norms which promote such developments and conducting an analysis of the legal risks which they face, given the applicable rules of liability. This comparative study – carried out by members of the Lexing® Network – proposes an overview, having regard to the legislation of 17 different countries, of the legal issues raised by robotics and the way the law in force responds, in a more or less satisfactory manner. This collection of essays examines how the paratextual apparatus of medieval manuscripts both inscribes and expresses power relations between the producers and consumers of knowledge in this important period of intellectual history. It seeks to define which paratextual features – annotations, commentaries, corrections, glosses, images, prologues, rubrics, and titles – are common to manuscripts from different branches of medieval knowledge and how they function in any particular discipline. It reveals how these visual expressions of power that organize and compile thought on the written page are consciously applied, negotiated or resisted by authors, scribes, artists, patrons and readers. This collection, which brings together scholars from the history of the book, law, science, medicine, literature, art, philosophy and music, interrogates the role played by paratexts in establishing authority, constructing bodies of knowledge, promoting education, shaping reader response, and preserving or subverting tradition in medieval manuscript culture.

The Notary Public Handbook is your official source of laws related to notaries public in

California. A notary public is a public official who performs invaluable services for the legal, business, financial, and real estate communities. Although there are no significant statutory changes for 2019, new additions this year include a fee table on page 19 and an Index at the back of the handbook to better assist you in finding information on a specific topic of interest. This Notary Public Handbook is designed to supplement your course of study, which will prepare you for the notary public examination. All statutory references are to California Codes, unless otherwise indicated. Once you are commissioned, the Secretary of State strongly recommends that you keep your Notary Public Handbook as a ready reference to help you perform your duties.

The income gap between women and men has gotten lots of attention in the last few decades: today women earn seventy-nine cents for every dollar men earn. But fewer people are aware of the much more serious wealth gap: for every dollar in wealth men own, women own thirty-two cents. Thirty-two cents! Wealth matters. Wealth is what gives us a financial safety net when we lose our jobs, break up a relationship or divorce, we or our dependents become sick, or when we are hit by some other financial crisis. It enables us to build security, to give our children a future, and to retire. It is passed from generation to generation, allowing wealthy families to stay wealthy over time. Wealth can generate income, whether through investments in the financial markets, or real estate, or through funding a startup business, and more. Significant wealth even allows us to influence our world by allowing us to contribute to political campaigns and policy initiatives. For these reasons, wealth is a better indicator of financial status than income: it reveals who is secure and influential and who is not. By treating women and men equally without recognizing the gross social and economic advantages that differentiate us, the law perpetuates the wealth gap. Here, Carla Spivack takes readers through a tour of a woman's life stages and the property laws that may apply and hinder their financial independence. From living together to marriage, from divorce to inheritance, the circumstances invite unfair treatment that leaves women out in the cold. Understanding how to protect your assets, fight for what is fair, and increase financial security is increasingly important as the wage gap continues to flourish. Readers will learn

about the laws that work against them and how to protect themselves regardless of their relationship status. For all women of all ages, here is your guide to keeping your wealth no matter how your relationship fares.

In a 2009 study of the debt collection industry, the Commission concluded that the "most significant change in the debt collection business in recent years has been the advent and growth of debt buying." "Debt buying" refers to the sale of debt by creditors or other debt owners to buyers that then attempt to collect the debt or sell it to other buyers. Debt buying can reduce the losses that creditors incur in providing credit, thereby allowing creditors to provide more credit at lower prices. Debt buying, however, also may raise significant consumer protection concerns. The FTC receives more consumer complaints about debt collectors, including debt buyers, than about any other single industry. Many of these complaints appear to have their origins in the quantity and quality of information that collectors have about debts. In its 2009 study, the Commission expressed concern that debt collectors, including debt buyers, may have insufficient or inaccurate information when they collect on debts, which may result in collectors seeking to recover from the wrong consumer or recover the wrong amount. The FTC initiated this debt buyer study in late 2009 for two main purposes. First, the FTC sought to obtain a better understanding of the debt buying market and the process of buying and selling debt. Second, the Commission wanted to explore the nature and extent of the relationship, if any, between the practice of debt buying and the types of information problems that the FTC has found can occur when debt collectors seek to recover and verify debts. Many stakeholders recognize the concerns that have been raised about debt buying, including consumer groups, members of Congress, federal and state regulatory and enforcement agencies, and the debt buyer industry itself. Indeed, the debt buyer industry has launched a self-regulatory effort to address some of these concerns, and the FTC is encouraged by that effort. This study of debt buyers is the first large-scale empirical assessment of the debt buying sector of the collection industry. The FTC hopes that its findings contribute to a greater understanding of debt buying, enhance ongoing reform efforts, and prompt further study of the industry. To conduct its study, the Commission obtained information about debts and debt buying practices from nine of the largest debt buyers that collectively bought 76.1% of the debt sold in 2008, with six of these debt buyers providing the information the Commission used in most of its analysis. The FTC also

considered its prior enforcement and policy work as highbrow cultural forms, this collection related to debt collection, as well as available research concerning debt buying. The study focused on large debt buyers because they account for most of the debt purchased; it did not address the practices of smaller debt buyers that are a frequent source of consumer protection concerns, a limitation that must be considered in evaluating the study's findings. The Commission acquired and analyzed an unprecedented amount of data from the studied debt buyers, which submitted data on more than 5,000 portfolios, containing nearly 90 million consumer accounts, purchased during the three-year study period. These accounts had a face value of \$143 billion, and the debt buyers spent nearly \$6.5 billion to acquire them. Most portfolios for which debt buyers submitted data were credit card debt, with such debt accounting for 62% of all portfolios and 71% of the total amount that the buyers spent to acquire debts. In addition to these data, the debt buyers provided copies of many purchase and sale agreements between themselves and sellers of debts. The debt buyers also submitted narrative responses to questions concerning their companies and their practices, as well as the debt buying industry. The key findings of the study are as follows:

Is Superman Canadian? Who decides, and what is at stake in such a question? How is the Underground Railroad commemorated differently in Canada and the United States, and can those differences be bridged? How can we acknowledge properly the Canadian labour behind Hollywood filmmaking, and what would that do to our sense of national cinema? Reading between the Borderlines grapples with these questions and others surrounding the production and consumption of literary, cinematic, musical, visual, and print culture across the Canada-US border. Discussing a range of popular as well as highbrow cultural forms, this collection investigates patterns of cross-border cultural exchange that become visible within a variety of genres, regardless of their place in any arbitrarily devised cultural hierarchy. The essays also consider the many interests served, compromised, or negated by the operations of the transnational economy, the movement of culture's "raw material" across nation-state borders in literal and conceptual terms, and the configuration of a material citizenship attributed to or negotiated around border-crossing cultural objects. Challenging the oversimplification of cultural products labelled either "Canadian" or "American," Reading between the Borderlines contends with the particularities and complications of North American cultural exchange, both historically and in the present.

In Arizona, a notary public is a public officer commissioned by the Secretary of State to perform notarial acts, as defined in the Arizona Revised Statutes (see Chapter 5). A notary, in essence, serves as an impartial witness pursuant to A.R.S. § 41-328(B). Government offices, businesses and the public rely on the accuracy and integrity of notaries public. This means the notary should take the required steps to authenticate signatures and ensure that all notarizations are properly completed and performed. Many documents require a notarization in an effort to deter fraud, to prove the authenticity of the signature and to ensure that a signature was made willingly and not under duress. Therefore, it's essential that a notary accept a valid form of identification, as defined in statutes, to determine that a signer is who he or she claims to be. Because the prevention of fraud and deception is central to the notary's role, it is essential that a notary have no conflict of interest when notarizing a document.
