McGraw-Hill's "Connect" is a web-based assignment and assessment platform that helps you connect your students to their coursework and to success beyond the course.

Calculus 12 | Lord Byng Math Department
Calculus is motivated by two problems, both leading to the same idea. The rst problem, which motivates this course, is the tangent line problem: given a curve, how do we describe the tangent line at a particular point on the curve? The second problem, which motivates the next course, in integral calculus, is the area problem: given a

McGraw-Hill Connect
First, this text is not the most comprehensive and does lack rigor. Specifically the author avoids taking the examples beyond the most basic and there is no progression of building on examples to eventually illustrate the harder cases. However, in the context of being a "first course" it fits that goal 100%.

Calculus A First Course Mcgraw
to do both-but not in one section. Calculus may be a good course, but it is not magic. The first step is to let the velocity change in the steadiest possible way. Question 1 Suppose the velocity at each time t is v(t) = 2t. Find f (t). With zr= 2t, a physicist would say that the acceleration is constant (it equals 2). The
