Student Solutions Manual:
Calculus I with Integrated ...
SOLUTION The roots of
 $f(x) = x(x - 1)(x - 3)$
are $x = 0$, $x = 1$, and $x = 3$. Since f is a
polynomial, it is continuous and
differentiable everywhere.
Therefore Rolle's Theorem
applies on the intervals $[0, 1]$
and $[1, 3]$, and it tells us that at
least one critical point must exist
inside each of these intervals.
