Literature from Around the World Lexington Books

William A. Pettigrew and David Veevers put forward a new interpretation of the role Europe's overseas corporations played in early modern global history, recasting them from vehicles of national expansion to significant forces of global integration. Across the Mediterranean, Atlantic, Indian Ocean and Pacific, corporations provided a truly global framework for facilitating the circulation, movement and exchange between and amongst European and non-European communities, bringing them directly into dialogue often for the first time. Usually understood as imperial or colonial commercial enterprises, *The Corporation as a Protagonist in Global History* reveals the unique global sociology of overseas corporations to provide a new global history in which non-Europeans emerged as key stakeholders in European overseas enterprises in the early modern world. Contributors include: Michael D. Bennett, Aske Laursen Brock, Liam D. Haydon, Lisa Hellman, Leonard Hodges, Emily Mann, Simon Mills, Chris Nierstrasz, Edgar Pereira, Edmond Smith, Haig Smith, and Anna Winterbottom.

The Corporation as a Protagonist in Global History, c. 1550-1750 Prentice Hall

This book investigates the major changes in world history and world economy during the past five hundred years and explains to what extent world forces have been responsible for shaping both past and present. Its underlying theme is the struggle for power in which, since the sixteenth century, the West has prevailed. Many of the problems of the contemporary world - including terrorism - are the legacy of the period of Western domination. Until the rise of the West, and its incomparable impact on every branch of human activity, the centre of the world has been in Asia. By the nineteenth century world power was firmly in the hands of the West. America's later rise to world status was prompted by the two world wars. The most prominent of the Western nations, the US is now blamed for all the excesses of an earlier colonial age.

"Navies in Modern World History traces the role of navies in world history from the early nineteenth century, through both World Wars, to the onset of the twenty-first century. Lawrence Sondhaus examines the navies of Britain, France, Germany, the United States, Japan, Brazil, Chile and the Soviet Union, demonstrating the variety of ways in which these countries have made decisive use of naval power, and the challenges these navies faced when assembling equipment and stores, training sailors, and undertaking various missions, and shows in what ways the results helped change the course of modern world history." "This book also deals with aircraft carrier design and naval aviation in the second half of the twentieth century, and the leading role of navies and shipbuilders in key technological innovations of the nineteenth century and early twentieth, including advances in steam power, armour, guns and torpedoes. Today, technological break-throughs are centred around naval stealth and maritime propulsion systems. Special attention is devoted to the evolving state of naval technology, showing how the relative industrial capabilities of seafaring countries have been reflected in their maritime building programmes, providing an important link between the evolution of modern national fleets and the broader history of the period." Ancient History-Based Writing Lessons [Student Book] (Sixth Edition) Reaktion Books

History as a discipline faces a crisis of identity as Eurocentrism fades in a world where globalized visions compete to explain historical processes. Facing the challenge squarely, this volume comprising specialists on Asia, Africa, and Latin America explores the state of historical analysis in various world regions and appraises current views on what defines and challenges historical knowledge. It is widely accepted that Eurocentrism no longer seem acceptable in a world where others are reasserting their own notions of past and future. The post-World War II spatialities that guided both historical analysis and the division of labor in historical work are in the process of disappearing into more globalized visions. Constituencies left out of history in the past are making demands for the recognition of their historical presence. History as epistemology is under attack as a marker of Eurocentric modernity from non-historical ways of thinking, as well as from ideologies of postmodernism that deny to history its claims to truth. Indeed, the current situation in the field has been described by one distinguished historian as a cacophonous confusion. The challenge historians face is how to imagine new ways of writing history that overcome this confusion without falling back upon ideological and methodological prejudices that reproduce the problems of the past in new guises. The contributors discuss how these challenges are voiced and met in their different areas of specialization. Unsurprising in a volume that addresses a variety of regions and issues that are not only technically historiographical but also deeply cultural and political, the authors differ in their appraisal of the challenges presented by globalization, postmodernism, or postcolonialism. Yet they are united in their recognition of the validity of historical ways of knowing and their reaffirmation of the importance of history in grasping contemporary cultural and political problems. It is because history is entangled in a Eurocentric modernity that in a postmodern world it provides the medium for articulating alternatives to Eurocentrism and to history itself.

Modern world history : international relations from the First World War to the present Routledge

A COMPANION TO WORLD HISTORY "This new volume offers insightful reflections by both leading and emerging world historians on approaches, methodologies, arguments, and pedagogies of a sub-discipline that has continued to be in flux as well as in need of defining itself as a relevant alternative to

the traditional national, regional, or chronological fields of inquiry" Choice "The focus...on the practicalities of how to do world history probably gives it its edge. Its thirty-three chapters are grouped into sections that address how to set up research projects in world history, how to teach it, how to get jobs in it, how to frame it, and how it is done in various parts of the globe. It is an actual handbook, in other words, as opposed to a sample of exemplary work." English Historical Review A Companion to World History offers a comprehensive overview of the variety of approaches and practices utilized in the field of world and global history. This state-of-the-art collection of more than 30 insightful essays - including contributions from an international cast of leading world historians and emerging scholars in the field - identifies continuing areas of contention, disagreement, and divergence, while pointing out fruitful directions for further discussion and research. Themes and topics explored include the lineages and trajectories of world history, key ideas and methods employed by world historians, the teaching of world history and how it draws upon and challenges "traditional" approaches, and global approaches to writing world history. By considering these interwoven issues of scholarship and pedagogy from a transnational, interregional, and world/global scale, fresh insights are gained and new challenges posed. With its rich compendium of diverse viewpoints, A Companion to World History is an essential resource for the study of the world's past.

The Prospect of Global History takes a new approach to the study of global history, seeking to apply it, rather than advocate it. The volume seeks perspectives on history from East Asian and Islamic sources as well as European ones, and insists on depth in historical analysis. The Prospect of Global History will speak to those interested in medieval and ancient history as well as modern history. Chapters range from historical sociology to economic history, from medieval to modern times, from European expansion to constitutional history, and from the United States across South Asia to China.

History of Civilizations Wiley-Blackwell

"A higher education textbook on World History from 1400 to the present"--

Resources in Education Cambridge University Press

Cross-Cultural Encounters in Modern World History explores cultural contact as an agent of change. It takes an encounters approach to world history since 1500, rather than a political one, to reveal different perspectives and experiences as well as key patterns and transformations. It studies the spaces between cultures historically to help us transcend human differences today in a rapidly globalizing world. The text focuses on first encounters that suggest long-term developments and particularly significant encounters that have changed the direction of world history. Because of the complexities of these encounters, the author takes a user-friendly approach to keep the text accessible to students with varying backgrounds in history.

The Middle East in Modern World History Routledge

The History of Civilizations traces the history of man in this vast region from the Palaeolithic beginnings to circa 700 B.C. when the foundations for the formation of the great Empire were laid. Many different elements must come together before a human community develops to the level of sophistication commonly referred to as civilization. The first is the existence of settlements classifiable as towns or cities. This requires food production to be efficient enough for a large minority of the community to be engaged in more specialized activities-such as the creation of imposing buildings or works of art, the practice of skilled warfare, and above all the administration of a centralized bureaucracy capable of running the machinery of state. Despite the major role played by Central Asia in shaping the history of the past and of today, this vast region, stretching from the Caspian Sea to Mongolia and western China, had not been studied as a whole cultural entity in time and space. This multi-volume History of Civilizations of Central Asia, published in English, is the first attempt to present a comprehensive picture of the cultures that flourished and vanished at the heart of the Eurasian continent from the dawn of civilization to the present day. The book is an engaging and thought-provoking philosophical account that demonstrates that critical inquiry is an ongoing process with strains of continuity and evolution of Civilizations.

World History Thomson South-Western

This book is a thematic history of the world from 1780, the pivotal year of the revolutionary age, to the outbreak of the First World War in 1914. It brings together historical data and arguments from different societies in order to show how interconnected the world was, even before the onset of modern globalization. "The Birth of the Modern World, 1780-1914 demonstrates how events in Asia, Africa, and South America, from the decline of the eighteenth-century Islamic empires to the anti-European Boxer rebellion of 1900 in China, had a direct impact on European and American history. Conversely, it sketches the "ripple effects" of crises such as the European revolutions and the American Civil War. The book also considers the great themes of the nineteenth-century world: the rise of the modern state, industrialization, liberalism, and the progress of world religions. Engaging and original, this book both challenges and complements the dominant regional and national approaches traditionally adopted by historians.

World History, Culture, and Geography Taylor & Francis

The era from 1400 to 1800 saw intense biological, commercial, and cultural exchanges, and the creation of global connections on an unprecedented scale. Divided into two books, Volume 6 of the Cambridge World History series considers these critical transformations. The first book examines the material and political foundations of the era, including global considerations of the environment, disease, technology, and cities, along with regional studies of empires in the eastern and western hemispheres, crossroads areas such as the Indian Ocean, Central Asia, and the Caribbean, and sites of competition and conflict, including Southeast Asia, Africa, and the Mediterranean. The second book focuses on patterns of change, examining the expansion of Christianity and Islam, migrations, warfare, and other topics on a global scale, and offering insightful detailed analyses of the Columbian exchange, slavery, silver, trade, entrepreneurs, Asian religions, legal encounters, plantation economies, early industrialism, and the writing of history.
