One teenager in a skirt. One teenager with a lighter. One moment that changes both of their lives forever. If it weren't for the 57 bus, Sasha and Richard never would have met. Both were high school students from Oakland, California, one of the most diverse cities in the country, but they inhabited different worlds. Each day, their paths overlapped for a mere eight minutes. But one afternoon on the bus ride home from school, a single reckless act left Sasha severely burned, and Richard charged with two hate crimes and facing life imprisonment. In each of the first three editions of the bestselling Law 101, Jay Feinman gave readers an upbeat and vivid examination of the American legal system. Since the third edition was published in 2010, much has happened: several key Supreme Court cases have been decided, we've seen sensational criminal trials, and the legal system has had to account for the latest developments in Internet law. This fully updated fourth edition of Law 101 accounts for all this and more, as Feinman once again provides a clear introduction to American law. The book covers all the main subjects taught in the first

year of law school, and discusses every facet of the American legal tradition, including constitutional law, the litigation process, and criminal, property, and contracts law. To accomplish this, Feinman brings in the most noteworthy, infamous, and often outrageous examples and cases. We learn about the case involving scalding coffee that cost McDonald's half a million dollars, the murder trial in Victorian London that gave us the legal definition of insanity, and the epochal decision of Marbury vs. Madison that gave the Supreme Court the power to declare state and federal law unconstitutional. A key to learning about the law is learning legal vocabulary, and Feinman helps by clarifying terms like "due process" and "equal protection," as well as by drawing distinctions between terms like "murder" and "manslaughter." Above all, though, is that Feinman reveals to readers of all kinds that despite its complexities and quirks, the law is can be understood by everyone. Perfect for students contemplating law school, journalists covering legislature, or even casual fans of "court-television" shows, Law 101 is a clear and accessible introduction to the American legal system. New to this edition: Featured analysis of: -the Obamacare case -Citizens United -the DOMA decision

-the Trayvon Martin case As well as recent legal developments pertaining to:
-online contracting -mortgages
-police investigations -criminal sentencing

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application.

Strengthening Forensic Science in the United States:

A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and

enforce standards within the forensic science community.

The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration.

Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs.

While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
