“ We have fun and we enjoy each
other ’ s company, so why shouldn ’
we just move in together? ” —Lauren
from Cohabitation Nation Living
together is a typical romantic rite
of passage in the United States
today. In fact, census data shows a
37 percent increase in couples who
choose to commit to and live with
one another, forgoing marriage.
And yet we know very little about
this new “ normal ” in romantic life.

When do people decide to move in
together, why do they do so, and
what happens to them over time?
Drawing on in-depth interviews,
Sharon Sassler and Amanda Jayne
Miller provide an inside view of how
cohabiting relationships play out
before and after couples move in
together, using couples ’ stories to
explore the he said/she said of
romantic dynamics. Delving into hot-
button issues, such as housework,
birth control, finances, and
expectations for the future, Sassler
and Miller deliver surprising

insights about the impact of class and education on how relationships unfold. Showcasing the words, thoughts, and conflicts of the couples themselves, *Cohabitation Nation* offers a riveting and sometimes counterintuitive look at the way we live now.

The Concept of God Wipf and Stock Publishers

The Bible constantly and repeatedly calls for us to be a holy people. In response, Dr. George Lyons takes an in-depth look at the 'holiness' embedded in 1

Thessalonians, Ezekiel, Mark, Galatians, and Philippians and shows us the distinguishing marks of a holy life. Paper. *God's Invitation to Become Fully Human* SAGE Publications

Free Will in Philosophical Theology Routledge
Open Theology offers an advantageous framework for engaging the sciences. With its emphasis upon creaturely freedom, relationality, realist epistemology, and love, *Open Theology* makes a fruitful dialogue partner with leading fields and theories in contemporary science. In *Creation Made*

Free, leading proponents of open theism explore natural and social scientific dimensions of reality as these dimensions both inform and are informed by *Open Theology*. Important themes addressed include evolution, creation ex nihilo, emergence theory, biblical cosmology, cognitive linguistics, quantum theory, and forgiveness.

Strategies for Survival and Success in the Twenty-first Century Macmillan

A kite hangs from a tree. A young boy grieves the loss. This simple tale of a boy and his kite reveals a profound truth - There is always more to the story. *Bulletin* Rowman & Littlefield

The Encyclopedia of Global Health is a comprehensive A to Z, inter-disciplinary, one-stop reference to a broad array of health topics worldwide. Encompassing four volumes with some 1,200 articles in 2000 pages, the encyclopedia covers all aspects of health, including physical and mental health entries, biographies of major doctors and researchers, profiles of medical institutions, organizations, and corporations, descriptions of drugs and operations, articles on national health policies, and thematic health topics in the humanities. Pedagogical elements of the encyclopedia include an in-depth chronology detailing advances in health through history, a glossary of health definitions, extensive cross-references to related topics, and thorough bibliographic citations.

Prioritizing Academic Programs and Services **REVISED AND UPDATED** Increasing economic concerns make the new edition of this best-selling classic an invaluable resource for those who want and need to implement a proven step-by-step approach to reallocating resources in tough times. Thoroughly revised and updated, *Prioritizing Academic Programs and Services* includes new recommendations from the field, communication strategies for more successful campus implementation, a new section on the sources of hidden costs, and a *Prioritization Process and Implementation* workbook designed to help administrators avoid costly mistakes. This book includes access to additional content online, including models for prioritization from a variety of campuses. Based on the author's extensive consulting experience, this necessary and timely resource offers the best advice for addressing the current economic concerns affecting most colleges and universities. Praise for *Prioritizing Academic Programs and Services* "For more than a decade, higher education leaders have turned to Dickeson's practical guide to academic program assessment. These newly expanded approaches are just in time for today's competitive environment."

—SUZANNE SHIPLEY, president, Shepherd University "Dickeson provides a compelling rationale for program prioritization as well as a practical planning structure that promotes alignment between programs, resources, and university mission. Presidents and provosts can use his approach to frame campus discussions around the future of the institution and away from legacy programs whose time has passed."

—KYLE R. CARTER, provost and senior vice chancellor, Western Carolina University "Dickeson's approach ensures that critical decisions regarding academic programs and resource allocation are aligned with strategic goals and institutional mission. As one of the early adopters of the process that he proposes, I am convinced that it is a powerful and practical tool for any college or university committed to remaining focused, resilient, vital, and relevant in a dynamic and increasingly challenging environment." —DAVID MAXWELL, president, Drake University

A Contemporary Introduction Oxford University Press

A pithy account of theological rationality, justification and knowledge that avoids the twin pitfalls of modern rationalism and postmodern irrationalism. This lively and accessible survey debates with the ideas of key theological and philosophical thinkers, past and present,

providing a fresh understanding of theology as a discipline.

Histories of the Holocaust Columbia University Press

Up to 70% and even more of corporate Analytics Efforts fail!!! Even after these corporations have made very large investments, in time, talent, and money, in developing what they thought were good data and analytics programs. Why?

Because the executives and decision makers and the entire analytics team have not considered the most important aspect of making these analytics efforts successful. In this Book II of "It ' s All Analytics!" series, we describe two primary things: 1) What this "most important aspect" consists of, and 2) How to get this "most important aspect" at the center of the analytics effort and thus make your analytics program successful. This Book II in the series is divided into three main parts: Part I, Organizational Design for Success, discusses The need for a complete company / organizational Alignment of the entire company and its analytics team for making its analytics successful. This means attention to the culture – the company culture culture!!! To be successful, the CEO ' s and Decision Makers of a company / organization must be fully cognizant of the cultural focus on ' establishing a center of excellence in analytics ' . Simply, "culture – company

culture" is the most important aspect of a successful analytics program. The focus must be on innovation, as this is needed by the analytics team to develop successful algorithms that will lead to greater company efficiency and increased profits. Part II, Data Design for Success, discusses Data is the cornerstone of success with analytics. You can have the best analytics algorithms and models available, but if you do not have good data, efforts will at best be mediocre if not a complete failure. This Part II also goes further into data with descriptions of things like Volatile Data Memory Storage and Non-Volatile Data Memory Storage, in addition to things like data structures and data formats, plus considering things like Cluster Computing, Data Swamps, Muddy Data, Data Marts, Enterprise Data Warehouse, Data Reservoirs, and Analytic Sandboxes, and additionally Data Virtualization, Curated Data, Purchased Data, Nascent & Future Data, Supplemental Data, Meaningful Data, GIS (Geographic Information Systems) & Geo Analytics Data, Graph Databases, and Time Series Databases. Part II also considers Data Governance including Data Integrity, Data Security, Data Consistency, Data Confidence, Data Leakage, Data Distribution, and Data Literacy. Part III, Analytics Technology Design for Success, discusses Analytics Maturity and aspects of this maturity, like

Exploratory Data Analysis, Data Preparation, Feature Engineering, Building Models, Model Evaluation, Model Selection, and Model Deployment. Part III also goes into the nuts and bolts of modern predictive analytics, discussing such terms as AI = Artificial Intelligence, Machine Learning, Deep Learning, and the more traditional aspects of analytics that feed into modern analytics like Statistics, Forecasting, Optimization, and Simulation. Part III also goes into how to Communicate and Act upon Analytics, which includes building a successful Analytics Culture within your company / organization. All-in-all, if your company or organization needs to be successful using analytics, this book will give you the basics of what you need to know to make it happen.

American Presbyterians in the Revolutionary Era, 1758 – 1801 Beacon Hill Press

The Hunting of Hillary traces how an entire industry of hate, lies, and fear was created to persecute Hillary Clinton for decades and profit from it. In *The Hunting of Hillary*, Pulitzer prize winning political reporter Michael D'Antonio details the years of lies and insults heaped upon Hillary Clinton as she pursued a life devoted to politics and policy. The worst took the form of sexism and misogyny, much of it barely disguised. A pioneer for women, Clinton was burdened in ways no man ever was. Defined by a

right-wing conspiracy, she couldn't declare what was happening lest she be cast as weak and whiny. Nevertheless, she persisted and wouldn't let them define her. As *The Hunting of Hillary* makes clear, her achievements have been all the more remarkable for the unique opposition she encountered. The 2016 presidential election can only be understood in the context of the primal and primitive response of those who just couldn't imagine that a woman might lead. For those who seek to understand the experience of the most accomplished woman in American politics, *The Hunting of Hillary* offers insight. For those who recognized what happened to her, it offers affirmation. And for those who hope to carry Clinton's work into the future, it offers inspiration and instruction.

Leading Lives That Matter John Wiley & Sons

Life is never boring when you're a human magnet for the bizarre. For Allison Hawn, owning a cursed car, being attacked by a man wielding a foam sword, or having to battle an evil pony could manifest on any day ending in "y." These truly hilarious tales provide both bookworms and casual glimpsers with important life lessons, such as what to do if a woman dressed as a cat refuses to get off the roof of your vehicle. You're welcome.

Developing Technology-Rich Teacher Education Programs: Key Issues Templeton Foundation Press

A collection of stories about North Idaho native, Robert L. "Cougar Bob" Campbell. All of the stories are true. Author, B. J. Campbell, tells them as creative non-fiction.

Newsletter of the American Historical Association Thomas Dunne Books

This timely look at the state of Christian higher education in America contains descriptive, historical narratives that explore how fourteen Christian colleges and universities are successfully integrating faith and learning on their campuses despite the challenges posed by the increasingly pluralistic nature of modern culture. Written by respected representatives from seven major faith traditions - Roman Catholic, Lutheran, Reformed, Mennonite, Evangelical, Wesleyan/Holiness, and Baptist/Restorationist - these narratives are also preceded by introductory essays that define the worldview and theological heritage of each given tradition and ask what that tradition can contribute to the task of higher education.

Open Theology Engaging Science Wm. B. Eerdmans Publishing

In this compelling account, William Harrison Taylor examines the interdenominational pursuits of the American Presbyterian Church from 1758 to 1801 to

highlight the church's ambitious agenda of fostering and uniting a host of New World values, among them Christendom, nationalism, and territorial exceptionalism. In *Unity in Christ and Country: American Presbyterians in the Revolutionary Era, 1758 – 1801*, William Harrison Taylor investigates the American Presbyterian Church's pursuit of Christian unity and demonstrates how, through this effort, the church helped to shape the issues that gripped the American imagination, including evangelism, the conflict with Great Britain, slavery, nationalism, and sectionalism. When the colonial Presbyterian Church reunited in 1758, a nearly twenty-year schism was brought to an end. To aid in reconciling the factions, church leaders called for Presbyterians to work more closely with other Christian denominations. Their ultimate goal was to heal divisions, not just within their own faith but also within colonial North America as a whole. Taylor contends that a self-imposed interdenominational transformation began in the American Presbyterian Church upon its reunion in 1758. However, this process was altered by the church's experience during the American Revolution, which resulted in goals of Christian unity that had both spiritual and national objectives. Nonetheless, by the end of the century, even as the leaders in the Presbyterian Church strove for unity in Christ and country, fissures began to develop in the church that would one day divide it and further the sectional rift that would lead to the Civil War. Taylor engages a variety of sources, including the published and unpublished works of both the Synods of New York and

Philadelphia and the General Assembly of the Presbyterian Church in the United States, as well as numerous published and unpublished Presbyterian sermons, lectures, hymnals, poetry, and letters. Scholars of religious history, particularly those interested in the Reformed tradition, and specifically Presbyterianism, should find *Unity in Christ and Country* useful as a way to consider the importance of the theology's intellectual and pragmatic implications for members of the faith. *Theology in Search of Foundations* A&C Black We all know the saying, "Love can change the world." When science looks at love, it considers cosmology, sociobiology, evolutionary psychology, neurology, sex and romance, and the role of emotions as each relates to love. It also explores religious, ethical, and philosophical issues, such as virtue, creation ex nihilo, progress, divine action, agape, values, religious practices, pacifism, sexuality, friendship, freedom, and marriage. All affect the ways in which people understand each other and interact with one another. In this book, Oord explores these varied dimensions of love, illuminating the love-science symbiosis for both scholars and general readers. His definition of love is "to act intentionally, in sympathetic response to others (including God), to promote overall well-being. Love acts are influenced by previous actions and executed in the hope of attaining a high degree of good for all." He begins his study with an exploration of the role love plays in all major world religions: Hinduism, Buddhism, Confucianism, Judaism, Islam, and Christianity. He explains how divine love in action

can be viewed as consonant with the big bang theory and the continual creation of the universe. He looks at pacifism and concludes that nonviolence is not always the most loving thing (sometimes violence must be used to rescue victims or prevent holocausts). He explores the animal kingdom to see how creatures work together with the Creator to make the world a better place. And he analyzes the fundamentals of love, the basic characteristics of existence that must be present for love to be expressed. He concludes with the important argument that progress can best be made when religion and science work together to both understand and promote love. *Evangelical Studies Bulletin Prioritizing Academic Programs and Services* Reallocating Resources to Achieve Strategic Balance, Revised and Updated "Professionals are challenged each day by a changing landscape of technology and terminology. In recent history, especially the last 25 years there has been an explosion of terms and methods born that automate and improve decision-making and operations. One term called Analytics is an overarching description of a compilation of methodologies. But, AI (Artificial Intelligence), statistics, decision science, optimization which have been around for decades has resurged. Also, things like business intelligence, On-line Analytical Processing (OLAP) and many, many more have

been born or reborn. How is someone to make sense of all this methodology, terminology? This book, the first in a series of three, provides a look at the foundations of artificial intelligence and analytics and why readers need an unbiased understanding of the subject. The authors include the basics such as algorithms, mental concepts, models, and paradigms in addition to the benefits of machine learning. The book also includes a chapter on data and the various forms of data.

The authors wrap up this book with a look at next frontiers such as applications and designing your environment for success, which segue into the topics of the next two books in the series"--

The Other Classroom Beacon Hill Press

Like many contemporary issues, moral discourse finds itself in the middle of a great divide. On one side of the chasm sits much of contemporary Western philosophy, moral psychology and the social sciences, which often view morality as a purely natural phenomenon. This view argues that human morality can be fully explained by appealing to naturalistic processes such as kin selection, reciprocal altruism, cultural evolution, and various models of social contract theory. In this context, God's e...
