Cambridge IELTS 4 Audio CD Set (2 CDs) Cambridge University Press This publication is a result of the joint conference held by MATSDA and Fontys University of

Applied Sciences, the Netherlands, in Tilburg in June 2017. MATSDA is an international materials development association founded in 1993 which serves to bring together researchers, teachers, materials developers and publishers in an effort to improve the effectiveness of language learning materials. The 2017 conference centred on issues related to the development of meaning-focused

materials for language learning, and attracted presenters from twenty-five countries stretching from Greenland to Brazil. These issues are reflected in the chapters in this volume, with each one focusing on a different aspect of meaning-focused materials and many of them introducing the reader to previously unexplored facets of the theory of meaning-focused instruction and its application to

materials development. The contributions here are of essential value to post-graduate students, to teachers, to materials developers and to researchers. They are written to be academically rigorous, but at the same time accessible to newcomers to the field and to experienced experts alike. Based on the

volume explores
the relation
between the

tests. It brings
together
linguistic
investigations
into the text-
inherent
complexity of the
tests and a study
of the data

derived from their

study of text
complexity draws
on corpus
linguistics, text

systemic
functional
linguistics. Both
quantitative and
qualitative
analyses are
carried out on the
language used in
the reading texts
and in the related
tasks that make
up the corpus of
tests. The
assessment of
test difficulty, on
the other hand, is
informed by
research on
language testing,
and, in particular,
by findings and
methodologies of
Classical Test

Theory and Item Response Theory. Relevant aspects of these theories are used to analyze and interpret both the data obtained from the administration of the tests and the data collected by means of feedback questionnaires completed by test takers. The application of such diverse methodologies and the subsequent comparison of the results of the analyses has brought out interesting correlations between text-inherent complexity, perceived test difficulty and actual test difficulty. Cambridge IELTS 9 Cambridge University Press This volume reports research that informs the development of reading and listening assessment in IELTS. This volume brings together a set of eight IELTS-related research studies - four on reading and four on listening - conducted between 2005 and 2010. Findings from these studies provide valuable evidence on the validity, reliability, impact and practicality of the IELTS test; they are also instrumental in highlighting aspects needing attention, and thus directly inform the continuing evolution of the IELTS reading and listening tests. The volume reviews and comments on the specific contribution of each study to the ongoing process of IELTS reading and listening test design and development. English for Islamic Banking
