There is a growing trend in Europe and the United States towards local use of the referendum to decide land use matters. Local communities are taking a more active role in planning the building programmes around them. Using examples from the United States this book includes an analysis and overview of direct democracy, the increasing use of ballot box planning to settle land use issues, legal considerations of ballot box planning and the future of this type of urban management.

This book explores the international law framework governing the use of armed force in occupied territory through a rigorous analysis of the interplay between jus ad bellum, international humanitarian law, and international human rights law. Through an examination of state practice and opinio juris, treaty provisions and relevant international and domestic case law, this book offers the first comprehensive study on this topic. This book will be relevant to scholars, practitioners, legal advisors, and students across a range of sub-disciplines of international law, as well as in peace and conflict studies, international relations, and political science. This study will influence the way in which States use armed force in occupied territory, offering guidance and support in litigations before domestic and international courts and tribunals.

User modeling researchers look for ways of enabling interactive software systems to adapt to their users-by constructing, maintaining, and exploiting user models, which are representations of properties of individual users. User modeling has been found to enhance the effectiveness and/or

usability of software systems in a wide variety of situations. Techniques for user modeling have been developed and evaluated by researchers in a number of fields, including artificial intelligence, education, psychology, linguistics, human-computer interaction, and information science. The biennial series of International Conferences on User Modeling provides a forum in which academic and industrial researchers from all of these fields can exchange their complementary insights on user modeling issues. The published proceedings of these conferences represent a major source of information about developments in this area.
