Essential Cell Biology provides a

readily accessible introduction to the central concepts of cell biology, and its lively, clear writing and exceptional illustrations make it the ideal textbook for a first course in both cell and molecular biology. The text and figures are easy-to-follow, accurate, clear, and engaging for the introductory student. Molecular detail has been kept to a minimum in order to provide the reader with a cohesive conceptual framework for the basic science that underlies our current understanding of all of biology, including the biomedical sciences.

The Fourth Edition has been thoroughly revised, and covers the latest developments in this fast-moving field, yet retains the academic level and length of the previous edition. The book is accompanied by a rich package of online student and instructor resources, including over 130 narrated movies, an expanded and updated Question Bank. Essential Cell Biology, Fourth Edition is additionally supported by the Garland Science Learning System. This homework platform is designed to evaluate and improve

student performance and allows instructors to select assignments on specific topics and review the performance of the entire class, as well as individual students, via the instructor dashboard. Students receive immediate feedback on their mastery of the topics, and will be better prepared for lectures and classroom discussions. The user-friendly system provides a convenient way to engage students while assessing progress. Performance data can be used to tailor classroom discussion, activities, and lectures to address students' needs precisely and efficiently. Help students see biology's relevance by focusing on core concepts Eric Simon's Biology: The Core presents essential biological concepts, using a unique visual and hybrid approach. The succinct 12-chapter textbook uses dynamic figures and illustrations	organized into concise, self-contained 2-page modules that focus students' attention to what is most relevant. Biology: The Core pairs with Mastering Biology to offer extensive assignment options and support materials that provide instructors with maximum flexibility. For every concept in the text, Mastering Biology provides assignments and activities instructors can use to layer detail and tailor content to their course and the way they teach, including new Guided Video Tours of key modules and new Coaching Activities on scientific	literacy-all developed by author Eric Simon. Instructors can engage students in current issues and easily build active and relevant lectures with the unique set of "Current Topic" instructor resources that Biology: The Core offers, including Current Topic PowerPoint lectures, Mastering assignments, instructor topic guides, and Ready-to-Go Teaching Modules. Ready-to-Go Teaching Modules offer the best classroom tested activities and recommended assignments that the Biology: The Core , Mastering Biology, and

Learning Catalytics have to offer. The 3rd Edition focuses on current issues and presents active learning and flipped classroom strategies that encourage students to think and actively participate in the non-majors biology course. Ten new Core Issues modules engage students and help them see the relationship between key concepts and current issues they are familiar with such as nutrition, antibiotic resistance, diabetes, cancer, vaccinations, and more. Each of these ten beautifully illustrated modules conveys relevant	topics and core biological concepts, and are accompanied by a full suite of supplementary resources in Mastering Biology. Also available as a Pearson eText or packaged with Mastering Biology: Pearson eText is a simple-to-use, mobile-optimized, personalized reading experience that can be adopted on its own as the main course material. It lets students highlight, take notes, and review key vocabulary all in one place, even when offline. Seamlessly integrated videos and other rich media engage students and give	them access to the help they need, when they need it. Educators can easily share their own notes with students so they see the connection between their eText and what they learn in class - motivating them to keep reading, and keep learning.
