and tricks -  
Crankshaft  
Part 2 of 2: Installing  
the new camshaft  
position sensor. Step  
1: Install the new  
sensor. Push the  
sensor straight in and  
align the bolt flange  
with the mounting  
hole. Step 2: Install the  
sensor mounting  
screws. Install the  
sensor mounting  
screws and tighten  
them down using a  
wrench or ratchet and  
socket of the  
appropriate size.

Nissan Juke Service  
and Repair Manual :  
Camshaft  
On a complete engine  
assembly, it is often  
helpful to install the  
camshaft BEFORE the  
crankshaft; in many  
cases the cam would  
be the first major part  
to be installed by the  
assembler after "final  
cleaning" of the block  
(the cam bearings and  
block plugs are likely  
to be installed by the  
machine shop).

Hold the camshaft  
hexagonal part  
(A), and then  
secure the  
camshaft. c. Pull  
out the stopper pin  
(A) of chain  
tensioner (2) side  
from plug hole. Lift

the lever (B) up to  
align its hole  
position with the  
hole of the body. •  
When the lever  
hole (C) is aligned  
with the body hole  
position, the  
plunger (1) is fixed.
