How do we prepare children for a future we can't even imagine? Across Canada, a debate swirls around what our children will need to know in the face of huge technological, economic, social and political change. The question has become an ideological battleground, and there is a hunger for a deeper understanding of what we should be doing to prepare children now for the challenges of the future. This timely, important book is an answer to that call. In *Pushing the Limits*, Kelly Gallagher-Mackay and Nancy Steinhauer draw on their experiences as educational leaders to reveal that the schools of the future exist in the here and now. They introduce us to extraordinary Canadian public schools, deeply rooted in their communities, that are fostering innovators, nimble problem-solvers and engaged citizens, boosting math comprehension, cultivating creativity and using technology to broaden the parameters of learning. And they explore why the role of schools is expanding to nurture students' social-emotional skills and growth mindsets, and how vital this broader definition of education is to children's long-term health, happiness and success. This book provides a vision of what schooling can and should look like in our rapidly shifting world and explores how we—parents and teachers—can realize this vision together.

Reducing the persistent achievement gap between Aboriginal students and their peers is recognized as a national priority. This report springs from a study of schools that, despite extraordinary challenges, are producing tangible progress for Aboriginal learners. The research conducted in 2006 was designed to identify practices that appear to contribute to their success.

A survey was undertaken to obtain information about the use of standardized tests in assessing the achievement of Canadian elementary and secondary school students. This information was garnered from the ministries or departments of education of all ten Canadian provinces and one territory, and a sample of about 120 of the local school boards in the country. The questionnaires sent to the ministries and school boards were similar, and consisted of two parts. The first part contained questions of a general nature about the province-wide testing program, if any, that had been conducted during the 1991-92 school year. The second part of the questionnaire was focused on the particular tests used in system-wide testing by province or board during any of the four academic years 1989-90 to 1992-93.
