A comprehensive, innovative, evidence-based approach to ensuring multicultural competence in counseling. Designed to help students and new counselors acquire multicultural counseling competence, this book includes self-development opportunities for fostering awareness, knowledge, and the skills necessary for understanding cultural makeup, understanding others of diverse identities and experiences, and engaging in facilitative counseling relationships. Expanding on the features that made the first two editions widely popular, this revision provides a closer look at how to apply the information in practice through an expanded number of case studies and "Voices from the Field" features. The new edition includes additional information on ethics in multicultural counseling and operationalization of the 2015 multicultural and social justice counseling competencies; increases the focus on international and refugee populations and immigration issues; and provides additional coverage on alternative

counseling approaches with multicultural competencies. Communication Miracles for Couples McGraw Hill Professional Examining a century of university history, Larry Cuban tackles the age-old question: What is more important, teaching or research? Using two departments (history and medicine) at Stanford University as a case study, Cuban shows how universities have organizationally and politically subordinated teaching to research

for over one hundred years. He explains how university reforms, decade after decade, not only failed to dislodge the primacy of research but actually served to strengthen it. He examines the academic work of research and teaching to determine how each has influenced university structures and processes, including curricular reform. Can the dilemma of scholars vs. teachers ever be fully reconciled? This fascinating historical journey is a must read for all university administrators, faculty, researchers, and anyone concerned with educational reform. PROFINET is the first integrated Industrial Ethernet Standard for automation, and utilizes the advantages of Ethernet and TCP/IP for open communication from the corporate management level to the process itself. PROFINET CBA divides distributed, complex applications into autonomous units of manageable size. Existing fieldbuses such as PROFIBUS and AS-Interface can be integrated using so-called proxies. This permits separate and cross-vendor development, testing and commissioning of individual plant sections prior to the integration of the solution as a whole. PROFINET IO, with its particularly fast real-time communication, fulfills all demands currently placed on the transmission of process data and enables easy integration of existing fieldbus systems. Isochronous real-time (IRT) is used for isochronous communication in motion control applications. PROFINET depends on established IT standards for network management and teleservice. Particular to automation control engineering it offers a special security concept. Special industrial network technology consisting of active network components, cables and connection systems, together with recommendations for installation, complete the concept. This book serves as an introduction to PROFINET technology. Configuring

engineers, commissioning engineers and technicians are given an overview of the concept and the fundamentals they need to solve PROFINET-based automation tasks. Technical relationships and practical applications are described using SIMATIC products as example.

Climate Change is geared toward a variety of students and general readers who seek the real science behind global warming. Exquisitely illustrated, the text introduces the basic science underlying both the natural progress of climate change and the effect of human activity on the deteriorating health of our planet. Noted expert and author Edmond A. Mathez synthesizes the work of leading scholars in climatology and related fields, and he concludes with an extensive chapter on energy production, anchoring this volume in economic and technological realities and suggesting ways to reduce greenhouse-gas emissions. Climate Change opens with the climate system fundamentals: the workings of the atmosphere and ocean, their chemical interactions via the carbon cycle, and the scientific framework for understanding climate change. Mathez then brings the climate of the past to bear on our present predicament, highlighting the importance of paleoclimatology in understanding the current climate system. Subsequent chapters explore the changes already occurring around us and their implications for the future. In a special feature, Jason E. Smerdon, associate research scientist at Lamont-Doherty Earth Observatory of Columbia University, provides an innovative appendix for students.

Following one of the most contentious and surprising elections in US history, the new edition of this classic text demonstrates unequivocally: Campaigns matter. With new and revised chapters throughout, Campaigns and Elections American Style provides a real education in contemporary campaign politics. In the fifth edition, academics and campaign professionals explain how Trump won the presidency, comparing his sometimes novel tactics with tried and true strategies including how campaign themes and strategies are developed and communicated, the

changes in campaign tactics as a result of changing technology, new techniques to target and mobilize voters, the evolving landscape of campaign finance and election laws, and the increasing diversity of the role of media in elections. Offering a unique and careful mix of Democrat and Republican, academic and practitioner, and male and female campaign perspectives, this volume scrutinizes national and local-level campaigns with a special focus on the 2016 presidential and congressional elections and what those elections might tell us about 2018 and 2020. Students, citizens, candidates, and campaign managers will learn not only how to win elections but also why it is imperative to do so in an ethical way. Perfect for a variety of courses in American government, this book is essential reading for political junkies of any stripe and serious students of campaigns and elections. Highlights of the Fifth Edition Covers the 2016 elections with an eye to 2018 and 2020. Explains how Trump won the presidency, the changes in campaign tactics as a result of changing technology, new techniques to target and mobilize voters, the evolving landscape of campaign finance and election laws, and the increasing diversity of the role of media. Includes a new part structure and the addition of part introductions to help students contextualize the major issues and trends in campaigns and elections. Advance praise for Carrots and Sticks Don't Work: "Paul Marciano provides a wealth of prescriptive advice that absolutely makes sense. You can actually open the book to any chapter and gain ideas for immediate implementation." -- Beverly Kaye, coauthor of Love 'Em or Lose 'Em "This book should be in the hands of anyone who has to get work done through other people! It's an invaluable tool for any manager at any level." -- John L. Rice, Vice President Human Resources, Tyco International "Carrots and Sticks Don't Work provides a commonsense approach to employee engagement. Dr. Marciano provides great real-world insights, data, and practical examples to truly bring the RESPECT model to life." -- Renee Selman, President, Catalina Health Resources "The RESPECT model is one of the most

dynamic, engaging, and thought-provoking employee engagement tools that I have seen. Dr. Marciano's work will help you provide meaningful long-term benefits for your employees, for your organization, and for yourself." -- Andy Brantley, President and CEO, College and University Professional Association for Human Resources "This book provides clear advice and instruction on how to engage your team members and inspire them to a higher level of productivity, work satisfaction, and enjoyment. I am already utilizing its techniques and finding immediate positive changes." -- Robert Roth, Director, Accounting and Reporting, Colgate Palmolive Company The title says it all: Carrots and Sticks Don't Work. Reward and recognition programs can be costly and inefficient, and they primarily reward employees who are already highly engaged and productive performers. Worse still, these programs actually decrease employee motivation because they can make individual recognition, rather than the overall success of the team, the goal. Yet many businesses turn to these measures first—unaware of a better alternative. So, when it comes to changing your organizational culture, carrots and sticks don't work! What does work is Dr. Paul Marciano's acclaimed RESPECT model, which gives you specific, low-cost, turnkey solutions and action plans-- based on seven key drivers of employee engagement that are proven and supported by decades of research and practice—that will empower you to assess, troubleshoot, and resolve engagement issues in the workplace: Recognition and acknowledgment of employees' contributions Empowerment via tools, resources, and information that set employees up to succeed Supportive feedback through ongoing performance coaching and mentoring Partnering to encourage and foster collaborative working relationships Expectations that set clear, challenging, and attainable performance goals Consideration that lets employees know that they are cared about Trust in your employees' abilities, skills, and judgment Carrots and Sticks Don't Work delivers the same proven resources and techniques that have enabled trainers, executives, managers, and owners at operations ranging from branches of the United States government to Fortune 500 corporations to twenty-person outfits to realize demonstrable gains in employee productivity and job satisfaction. When you give a little RESPECT you get a more effective organization, with reduced turnover and absenteeism and employees at all levels who are engaged, focused, and committed to succeed as a team. In short, you get maximum ROI from your organization's most powerful resource: its people! Human Behavior and the Social Environment, Macro Level Avery An official, self-paced test exam

Ethical concerns are among the most common problems public administrators face, yet the issues are often complex, and the correct choices are not always clear. Living up to the public trust is much more than just an act of compliance. It also involves perceiving, preventing, avoiding, and resolving accusations of illegal or unethical behavior, including appearances of inappropriate behavior. *Ethics Moments in Government: Cases and Controversies* examines how to identify, assess, and resolve the ethical issues and dilemmas that often confront those who govern the cities, counties, states, and federal agencies throughout America. *Real Situations, Real Advice* Providing a one-stop resource for all those who must contend with thorny ethical issues, this volume presents case studies that vary in complexity and context and are based on real situations. Each case scenario is followed by discussion questions and case assessments by expert practitioners who describe how they would handle the situation. Using a "total immersion" technique, the book encourages readers to be reflexive and analytical in addressing the problems presented and arriving at appropriate solutions. A supplemental CD is included which contains PowerPoint® slide presentations, articles, workshop programs, tests, and links to organizations. For many of the scenarios presented in this volume, there are no easy answers. Practical guidance on reasoning through difficult decision-making situations enables public administrators to acquire the ethical knowledge, skills, abilities, and instincts that will ultimately help them gain the trust of their citizens and advance in their careers.

Buddhism: Introducing the Buddhist Experience focuses on the depth of Buddhist experience as expressed in the teachings and practices of a wide array of its religious and philosophical traditions.

Taking a broad and inclusive approach, this unique work spans over 2,500 years, featuring chapters on Buddhism's origins in India; Theravada and Mahayana Buddhism; and Buddhism in Southeast Asia, Tibet, China, Korea, and Japan. It also includes an extensive discussion of modern, socially engaged Buddhism and a concluding chapter on the spread of Buddhism to the West. Mitchell provides substantial selections of primary text material throughout that illustrate a great variety of moral, psychological, meditative, and spiritual Buddhist experiences. Buddhism features twenty-two boxed personal narratives provided by respected Buddhist leaders and scholars from around the world, including His Holiness the Dalai Lama, Dharma Master Sheng Yen, Dharma Master Cheng Yen, Jeffrey Hopkins, Sulak Sivaraksa, Rita M. Gross, Chatsumarn Kabilsingh, and Robert Aitken. These concise and intriguing essays give students a glimpse into what the topics discussed in the book actually mean in terms of human experience today. Ideal for courses in Buddhism, Asian religions, and Asian philosophy, Buddhism also incorporates helpful maps, numerous illustrations, a glossary, and suggestions for further reading.
