"During the 1870s, 7,000 Mennonites - descendants of Dutch and German Anabaptists - arrived in Canada to settle in the

newly created province of Manitoba. While in Europe, they had steadily moved eastward under pressure of persecution and governmental restrictions until they settled in "foreign colonies" in New Russia (Ukraine) in 1789. Generations of living as non-citizen settlers under special arrangements with the ruler had reinforced their separatist understanding of what it meant to live in nonconformity with the world." "Adolf Ens's volume traces the tensions of Mennonites becoming full citizens in the participatory democracy of Canada through the crucial steps of immigration, settlement and naturalization, implementing local municipal government, and

becoming part of the public school system. This process was greatly complicated by the outbreak of the First World War and the intolerance it produced toward those who were pacifist, German, and different." "Almost 8,000 of the descendants of this immigrant group left for Latin America in the aftermath of the war, becoming subjects once again. The rest gradually accommodated themselves to being full Canadian citizens."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

Deportation has again taken a prominent place within the

immigration policies of nation-states. Irregular Citizenship, Immigration, and Deportation addresses the social responses to deportation, in particular the growing movements against deportation and detention, and for freedom of movement and the regularization of status. The book brings deportation and anti-deportation together with the aim of understanding the political subjects that emerge in this contested field of governance and control, freedom and struggle. However, rather than focusing on the typical subjects of removal – refugees, the undocumented, and irregular migrants – Irregular Citizenship, Immigration, and Deportation looks at the ways that

citizens get caught up in the deportation apparatus and must struggle to remain in or return to their country of citizenship. The transformation of ‘ regular ’ citizens into deportable ‘ irregular ’ citizens involves the removal of the rights, duties, and obligations of citizenship. This includes unmaking citizenship through official revocation or denationalization, as well as through informal, extra-legal, and unofficial means. The book features stories about struggles over removal and return, deportation and repatriation, rescue and abandonment. The book features eleven ‘ acts of citizenship ’ that occur in the context of deportation and anti-

deportation, arguing that these struggles for rights, recognition, and return are fundamentally struggles over political subjectivity – of citizenship. This book will be of interest to students and scholars of citizenship, migration and security studies.

Birth-based citizenship is widely considered to be the most secure claim to political belonging. Despite the general belief that liberal democracies are formed through consent, in

fact, most people are members of a political community by virtue of the circumstances of their birth. In *Canadian Club*, Lois Harder tracks the development of Canada’s Citizenship Act from its first iteration in 1947 to the provisions governing the citizenship of children born abroad to Canadian parents with the assistance of reproductive technologies. Reviewing a range of cases, Harder reveals how membership in the

Canadian political community relies on norms surrounding gender, family, and sexuality, as well as presumptions regarding the constitution of "authentic" national identity, racial hierarchy, and the rightness of settler colonialism. Canadian Club concludes with a consideration of alternative approaches to forming political communities. Ultimately, it asks whether birth-based citizenship is the best we can do and what a

more democratic and socially just alternative might look like.

A century ago, the legal concept of Canadian and Australian Citizenship as we understand it today did not exist. It was not until 1946 and 1948, respectively, that Canada and Australia

adopted national citizenship, a move that allowed each country to define its own distinct character, and emphasize its independence from Britain and the Commonwealth. In this collection of essays, Canadian and Australian scholars examine the history, present, and future of citizenship in both countries. The book opens with two essays that examine the meaning and concept of citizenship, in both historical and contemporary contexts, and its relation to the state. The second section explores the early politics of citizenship including examinations of civic debate, democracy, women as citizens, and culture. The third section includes essays on the challenges that traditional British notions of citizenship have faced in both countries, including aboriginal rights and multiculturalism. The collection ends with a look to the future of citizenship, including discussions of identity, governance, nation-building, and globalization. By contrasting and comparing similar issues in two similar countries, these erudite and thought-provoking essays show how much each country has to gain through discussion and collaboration.

Under the terms of the Chinese Immigration Act of 1885, Canada implemented a vast protocol for acquiring detailed personal information about Chinese migrants. Among the bewildering array of state documents used in this effort were CI 9s: issued from 1885 to 1953, they included date of birth, place of residence, occupation, identifying marks, known associates, and, significantly, identification photographs. The originals were transferred to microfilm and destroyed in 1963; more than 41,000 grainy reproductions of CI 9s remain. Lily Cho explores how the CI 9s functioned as a form of surveillance and a process of mass capture that produced non-citizens, revealing

the surprising dynamism of non-citizenship constantly regulated and monitored, made and remade, by an anxious state. The first mass use of identification photography in Canada, they make up the largest archive of images of Chinese migrants in the country, including people who stood no chance of being photographed otherwise. But CI 9s generated far more information than could be processed, and there is nothing straightforward about the knowledge that they purported to contain. Cho finds traces of alternate forms of kinship in the archive as well as evidence of the ways that families were separated. In attending to the particularities of these images and documents, Mass

Capture uncovers the alternative story that lies in the refusals and resistances enacted by the mass captured. Illustrated with painstakingly reconstituted digital reproductions of the microfilm record, *Mass Capture* reclaims the CI 9s as more than documents of racist repression, suggesting the possibilities for beauty and dignity in the archive, for captivation as well as capture.

If you intend to visit Canada, study or work in Canada, immigrate to Canada, or become a Canadian citizen, you need to go through an application process. A typical application includes submitting some forms and documents to the immigration authorities. Some applications, however,

mandate you to attend a phone or face to face interview with an immigration or border services officer. Most of the immigration applications are time-consuming and nerve-racking. Several laws, policies, and procedures govern immigration applications. Many of them, such as inadmissibility rules, are complex or ambiguous. Even when you submit a simple eTA application, you need to answer questions about these complex aspects of immigration. Al Parsai is a Regulated Canadian
