An Introduction CRC Press
Griffiths? Canadian Criminal Justice: A Primer provides a succinct yet thorough introduction to the dynamic and complex Canadian criminal justice system for students without significant prior exposure to the field. In fourteen brief chapters, the text presents a current, accessible overview of the distinct parts of the criminal justice system as they are evolving in response to the technological and societal changes of the 21st century. The fifth edition includes enhanced coverage of the impact of technology in addition to enhanced coverage of the experiences of Aboriginal Canadians, women, and youth. In addition to an overview of the structural and procedural elements of the system, the author highlights the human dynamics of the system. The new At Issue boxes present the key, current issues surrounding this country?s responses to crime and offenders, capturing students? attention and generating classroom discussion. Three new chapters on restorative justice, victimization and the community?s role, and the creation of an effective criminal justice system enhance this market-leading text, helping to create a highly engaged community of learners who come to class prepared and eager to discuss the issues presented in the text.

This book is the first of two volumes devoted to the history of law in Canada. This volume begins at a time just prior to European contact and continues to the 1860s, while volume two will start with Confederation and end at approximately 2000. The history of law includes substantive law, legal institutions, legal actors and legal culture. The book assumes that since 1500 there have been three legal systems in Canada – the Indigenous, the French, and the English. At all times, these systems have co-existed and interacted, with the relative power and influence of each being more or less dominant in different periods. The history of law cannot be treated in isolation, and this book examines law as a dynamic process, shaped by and affecting other histories over the long term. The law guided and was guided by economic developments, was influenced and moulded by the nature and trajectory of political ideas and institutions, and variously exacerbated and mediated by inter-cultural exchange and conflict. These themes are apparent in this examination, and through most areas of law including family law, constitutional, commercial, land settlement and tenure, and criminal.

Geocomputation is the use of software and computing power to solve complex spatial problems. It is gaining increasing importance in the era of the 'big data' revolution, of 'smart cities', of crowdsourced data, and of associated applications for viewing and managing data geographically - like Google Maps. This student focused book: Provides a selection of practical examples of geocomputational techniques and 'hot topics' written by world leading practitioners. Integrates supporting materials in each chapter, such as code and data, enabling readers to work through the examples themselves. Chapters provide highly applied and practical discussions of: Visualisation and exploratory spatial data analysis Space time modelling Spatial algorithms Spatial regression and statistics Enabling interactions through the use of neogeography All chapters are uniform in design and each includes an introduction, case studies, conclusions - drawing together the generalities of the introduction and specific findings from the case study application - and guidance for further reading. This accessible text has been specifically designed for those readers who are new to Geocomputation as an area of research, showing how complex real-world problems can be solved through the integration of technology, data, and geocomputational methods. This is the applied primer for Geocomputation in the social sciences.

Indigenous peoples are vastly overrepresented in the Canadian criminal justice system. The Canadian government has framed this disproportionate victimization and criminalization as being an "Indian problem." In *The Colonial Problem*, Lisa Monchalin challenges the myth of the "Indian problem" and encourages readers to view the crimes and injustices affecting Indigenous peoples from a more culturally aware position. She analyzes the consequences of assimilation policies, dishonoured treaty agreements, manipulative legislation, and systematic racism, arguing that the overrepresentation of Indigenous peoples in the Canadian criminal justice system is not an Indian problem but a colonial one.

The criminal justice system is wide ranging: it covers crimes, policing, the sentencing of offenders, and prisons. This title draws upon the latest research and current practices from around the world. Focusing on the adversarial model of justice found in common law countries such as the US, UK, Canada, and Australia, it discusses topics such as the uses of imprisonment, the effects of capital punishment, and the purposes of sentencing. Considering the role of the victim, as well as public knowledge and attitudes towards criminal justice, it assesses the way in which the system functions.

Gender and Policing is an innovative study of the real world of street policing and the gender issues which are a central part of this. Derived from extensive ethnographic research (involving police responses to gangland shootings, high speed car chases as well as more routine policing activities), this book examines the way police attitudes and beliefs combine to perpetuate a working culture which is dependent upon traditional conceptions of 'male' and 'female'. In doing so it challenges previously held assumptions about the way women are harassed, manipulated and constrained, focusing rather on the more subtle impact of structures and norms within police culture. *Gender and Policing* will be of interest to all those concerned with questions of policing and gender, and occupational culture more generally, while the theoretical framework developed will provide an important foundation for strategies of reform. At the same time the book provides a vivid and richly textured picture of the realities of operational policing in contemporary Britain.

It is conventional wisdom that there is a grave crisis in our criminal courts: the widespread reliance on plea-bargaining and the settlement of most cases with just a few seconds before the judge endanger the rights of defendants. Not so, says Malcolm Feeley in this provocative and original book. Basing his argument on intensive study of the lower criminal court system, Feeley demonstrates that the absence of formal "due process" is preferred by all of the court's participants, and especially by defendants. Moreover, he argues, "it is not all clear that as a group defendants would be better off in a more 'formal' court system," since the real costs to those accused of misdemeanors and lesser felonies are not the fines and prison sentences meted out by the court, but the costs incurred before the case even comes before the judge—lost wages from missed work, commissions to bail bondsmen, attorney's fees, and wasted time. Therefore, the overriding interest of the accused is not to secure the formal trappings of the judicial process, but to minimize the time, and money, spent dealing with the court. Focusing on New Haven, Connecticut's, lower court, Feeley found that the defense and prosecution often agreed that the pre-trial process was sufficient to "teach the defendant a lesson." In effect, Feeley demonstrates that the informal practices of the lower courts as they are presently constituted are more "just" than they are usually given credit for being. "... a book that should be read by anyone who is interested in understanding how courts work and how the criminal sanction is administered in modern, complex societies."— Barry Mahoney, Institute for Court Management, Denver "It is grounded in a firm grasp of theory as well as thorough field research."—Jack B. Weinstein, U.S. District Court Judge." a feature that has long been the hallmark of good American sociology: it recreates a believable world of real men and women."—Paul Wiles, Law & Society Review. "This book's findings are well worth the attention of the serious criminal justice student, and the analyses reveal a thoughtful, probing, and provocative intelligence....an important contribution to the debate on the role and

limits of discretion in American criminal justice. It deserves to be read by all those who are interested in the outcome of the debate." —Jerome H. Skolnick, American Bar Foundation Research Journal

Life histories can be defined as the means by which individuals (or more precisely genotypes) vary their age- or stage-specific expenditures of reproductive effort in response to genetic, phenotypic, and environmental correlates of survival and fecundity. Life histories reflect the expression of traits most closely related to individual fitness, such as age and size at maturity, number and size of offspring, and the timing of the expression of those traits throughout an individual's life. In addition to addressing questions of fundamental importance to ecology and evolution, life-history research plays an integral role in species conservation and management. This accessible primer encompasses the basic concepts, theories, and applied elements of life history evolution, including patterns of trait variability, underlying mechanisms of plastic/evolutionary change, and the practical utility of life-history traits as metrics of species/population recovery, sustainable exploitation, and risk of extinction. Empirical examples are drawn from the entire spectrum of life. A Primer of Life Histories is designed for readers from a broad range of academic backgrounds and experience including graduate students and researchers of ecology and evolutionary biology. It will also be useful to a more applied audience of academic/government researchers in fields such as wildlife biology, conservation biology, fisheries science, and the environmental sciences.

A Primer on Federal and State Law Regarding Marijuana, Hemp, and CBD Scarborough, Ont. : Nelson Thomson Learning

"You can't handle the truth." These iconic words, bellowed by Jack Nicholson as Colonel Jessup in the 1992 movie A Few Good Men, became an emblem of the conflict between honor and truth that the collective imagination often considers the quintessence of military justice. The military is the rare part of contemporary society that enjoys the privilege of policing its own members' behavior, with special courts and a separate body of rules. Whether one is for or against this system, military trials are fascinating and little understood. This book opens a window on the military judicial system, offering an accessible and balanced assessment of the strengths and weaknesses of military legal regimes around the world. It illuminates US military justice through a comparison with civilian and foreign models for the administration of justice, with a particular emphasis on the UK and Canadian military justice systems. Drawing on his experience as a serving officer, private practitioner, and law professor, Eugene R. Fidell presents a hard-hitting tour of the field, exploring military justice trends across different countries and compliance (or lack thereof) with contemporary human rights standards. He digs into critical issues such as the response to sexual assault in the armed forces, the challenges of protecting judicial independence, and the effect of social media and modern technology on age-old traditions of military discipline. A rich series of case studies, ranging from examples of

misconduct, such as the devastating Abu Ghraib photos, to political tangles, such as the Guantanamo military commissions, throw light on the high profile and occasionally obscure circumstances that emerge from today's military operations around the world. As Fidell's account shows, by understanding the mechanism of military justice we can better comprehend the political values of a country. "

The United States currently is deporting more people than ever before: 4 million people have been deported since 1997 -twice as many as all people deported prior to 1996. There is a disturbing pattern in the population deported: 97% of deportees are sent to Latin America or the Caribbean, and 88% are men, many of whom were originally detained through the U.S. criminal justice system. Weaving together hard-hitting critique and moving first-person testimonials, *Deported* tells the intimate stories of people caught in an immigration law enforcement dragnet that serves the aims of global capitalism. Tanya Golash-Boza uses the stories of 147 of these deportees to explore the racialized and gendered dimensions of mass deportation in the United States, showing how this crisis is embedded in economic restructuring, neoliberal reforms, and the disproportionate criminalization of black and Latino men. In the United States, outsourcing creates service sector jobs and more of a need for the unskilled jobs that attract immigrants looking for new opportunities, but it also leads to deindustrialization, decline in urban communities, and, consequently, heavy policing. Many immigrants are exposed to the same racial profiling and policing as native-born blacks and Latinos. Unlike the native-born, though, when immigrants enter the criminal justice system, deportation is often their only way out. Ultimately, Golash-Boza argues that deportation has become a state strategy of social control, both in the United States and in the many countries that receive deportees.
