The contents of this book include the Marxist theories on state and law, the radical concept of crime, incipient radicalism: conflict and labeling approaches, the causes of crime: a radical view, traditional contributions to radical criminology, the radical perspective on policing, the American court system: a justice model, a critical interpretation of punishment and corrections, and the policy implications of the radical position.

A Very Short Introduction Oxford University Press

The United States currently is deporting more people than ever before: 4 million people have been deported since 1997 -twice as many as all people deported prior to 1996. There is a disturbing pattern in the population deported: 97% of deportees are sent to Latin America or the Caribbean, and 88% are men, many of whom were originally detained through the U.S. criminal justice system. Weaving together hard-hitting critique and moving first-person testimonials, *Deported* tells the intimate stories of people caught in an immigration law enforcement dragnet that serves the aims of global capitalism. Tanya Golash-Boza uses the stories of 147 of these deportees to explore the racialized and gendered dimensions of mass deportation in the United States, showing how this crisis is embedded in economic restructuring, neoliberal reforms, and the disproportionate criminalization of black and Latino men. In the United States, outsourcing creates

service sector jobs and more of a need for the unskilled jobs that attract immigrants looking for new opportunities, but it also leads to deindustrialization, decline in urban communities, and, consequently, heavy policing. Many immigrants are exposed to the same racial profiling and policing as native-born blacks and Latinos. Unlike the native-born, though, when immigrants enter the criminal justice system, deportation is often their only way out. Ultimately, Golash-Boza argues that deportation has become a state strategy of social control, both in the United States and in the many countries that receive deportees.

Indigenous peoples are vastly overrepresented in the Canadian criminal justice system. The Canadian government has framed this disproportionate victimization and criminalization as being an "Indian problem." In *The Colonial Problem*, Lisa Monchalin challenges the myth of the "Indian problem" and encourages readers to view the crimes and injustices affecting Indigenous peoples from a more culturally aware position. She analyzes the consequences of assimilation policies, dishonoured treaty agreements, manipulative legislation, and systematic racism, arguing that the overrepresentation of Indigenous peoples in the Canadian criminal justice system is not an Indian problem but a colonial one.

It is conventional wisdom that there is a grave crisis in our criminal courts: the widespread reliance on plea-bargaining and the settlement of most cases with just a few seconds before the judge endanger the rights of defendants. Not so, says Malcolm Feeley in this provocative and original book. Basing his argument on intensive study of the lower criminal court system, Feeley demonstrates that the absence of formal "due process" is preferred by all of the court's participants, and especially by defendants. Moreover, he argues, "it is not all clear that as a group defendants would be better off in a more 'formal' court system," since the real costs to those accused of misdemeanors and lesser felonies are not the fines and prison sentences meted out by the court, but the costs incurred before the case even comes before the judge—lost wages from missed work, commissions to bail bondsmen, attorney's fees, and wasted time. Therefore, the overriding interest of the accused is not to secure the formal trappings of the judicial process, but to minimize the time, and money, spent dealing with

the court. Focusing on New Haven, Connecticut's, lower court, Feeley found that the defense and prosecution often agreed that the pre-trial process was sufficient to "teach the defendant a lesson." In effect, Feeley demonstrates that the informal practices of the lower courts as they are presently constituted are more "just" than they are usually given credit for being. "... a book that should be read by anyone who is interested in understanding how courts work and how the criminal sanction is administered in modern, complex societies."—Barry Mahoney, Institute for Court Management, Denver "It is grounded in a firm grasp of theory as well as thorough field research."—Jack B. Weinstein, U.S. District Court Judge." a feature that has long been the hallmark of good American sociology: it recreates a believable world of real men and women."—Paul Wiles, *Law & Society Review*. "This book's findings are well worth the attention of the serious criminal justice student, and the analyses reveal a thoughtful, probing, and provocative intelligence....an important contribution to the debate on the role and limits of discretion in American criminal justice. It deserves to be read by all those who are interested in the outcome of the debate." —Jerome H. Skolnick, *American Bar Foundation Research Journal*

This book is the first of two volumes devoted to the history of law in Canada. This volume begins at a time just prior to European contact and continues to the 1860s, while volume two will start with Confederation and end at approximately 2000. The history of law includes substantive law, legal institutions, legal actors and legal culture. The book assumes that since 1500 there have been three legal systems in Canada – the Indigenous, the French, and the English. At all times, these systems have co-existed and interacted, with the relative power and influence of each being more or less dominant in different periods. The history of law cannot be treated in isolation, and this book examines law as a dynamic process, shaped by and affecting other histories over the long term. The law guided and was guided by economic developments, was influenced and moulded by the nature and trajectory of political ideas and institutions, and variously exacerbated and mediated by inter-cultural exchange and conflict. These themes are apparent in this examination, and through most areas of law including family law, constitutional, commercial, land settlement and tenure, and criminal.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance

the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

This book explores the role of theory and research in criminology.

Adopting a unique and refreshing approach to criminological theory, this book focuses on the great debates in criminology from its inception as a field to the present day. It explores the debates that have motivated criminological thought, that have represented turning points in theoretical and empirical trajectories, that have offered mini-paradigm shifts, and that have moved the field forward. Coverage includes: Classical Debates, including the work of Lombroso, Durkheim and Sutherland, Sociological vs. psychological debates in criminology, Control theory and cultural deviance theory, Criminal career and trait-based theory, Theory testing in criminology, Critical theories in criminology, Debates on the state of criminology and criminal justice, Policy issues in criminology. Each chapter explores several key debates, summarizes key points, and offers a discussion of its current empirical status. This book is novel in emphasising the role of debate in criminology and offering an enlightening synthesis of theorists and their perspectives. It is essential reading for students
