Access to ProFile, Intuit's highly regarded professional tax preparation software, continues to be available for students and instructors using Buckwold/Kitunen.

Canadian Income Taxation McGraw-Hill Ryerson

This book covers topics that the "average Canadian" taxpayer will need to complete their income taxes all by themselves. It walks through the whole process from beginning to end using plain English. The majority of this book covers federal forms that apply to all Canadians, however since some of the necessary forms are provincial, this book covers the Ontario version of these forms. Specifically, the Ontario forms discussed here are those that are labelled ON428, ONBEN, ONS2 and ONS11. There are many income tax deductions and credits that apply to people who have different circumstances. To keep this book

reasonably short and as relevant as possible to the average Canadian, the focus has been placed on the most common tax scenarios. This includes Canadians with any marital status, and it includes taxpayers who are employees, parents, seniors, students, and/or unemployed. This guide applies to anyone who is preparing a regular personal tax return, either using tax software, or using paper forms. The rules and the forms are the same in either case. **Topics Covered*** Credits for spouse/partner* Credits for children ("dependants")* Income earned as an employee* Income earned from Employment Insurance (EI) while unemployed* Interest income, such as from a bank account, bonds, investment funds, etc* Capital gains and dividend income, such as from stocks, mutual funds, etc* Income earned from pensions, the Canada Pension Plan (CPP), and Old Age Security (OAS), as well as senior credits* Income Earned from Social Assistance* Donations to eligible charities* Registered Retirement Saving Plans (RRSPs)* How to claim credits for the rent paid* How to claim credits for the property taxes paid **Topics Not Covered *** Corporate income tax or Business income* Income from Self-Employment, Farming, Fishing, Partnerships* Income earned from Rental Property* Medical Expenses* Eligibility Criteria for Family Caregivers for Infirm Dependants* Worker's Compensation* Pension Splitting* Repayments to EI or UCCB* Capital Loss Carrybacks * Other credits and deductions: moving, activities, arts, adoption expenses, sports, disabilities, public transit credit, renovations, northern resident deductions, foreign tax credits, political contributions, capital gain reserves, etc
The Fundamentals of Canadian Income Tax CCH Canadian Limited
"The second volume of Fundamentals of Canadian Income Tax picks up exactly from where the first volume left off and examines the fundamental

principles of corporate income tax law. This volume introduces students to the income tax implications of corporate, commercial, and family transactions. As with its companion piece, Volume 1, we use a building block approach, starting with basic and fundamental legal principles of alternative business structures and their income tax effects. We look at the underlying policies and structure for the income taxation of corporations and shareholders, financing arrangements for equity and debt capital, the use of professional corporations, the taxation of business and investment income of private corporations, shareholder compensation, and corporate distributions to shareholders. In addition, we examine the nature of corporate reorganizations, tax-deferred rollovers, and non-arm's length share transfers, amalgamations, winding-up, the taxation of non-residents, transfer pricing, and selected aspects of estate planning. The text is current to January 1, 2018, and incorporates changes announced by the Ministry of Finance, but which were enacted into law later in 2018. It also contains a comprehensive glossary of tax and financial terms, which will be useful for students and practitioners in commercial practices." -- Back Cover.
