Richardson et al. 's respected and seminal Policy Styles in Western Europe (1982) shed valuable light on how countries tend to establish long-term and distinctive ways to make policies that transcend short-term imperatives and issues. This follow-up volume updates those arguments and significantly expands the coverage, consisting of 16 carefully selected country-level case studies from around the world. Furthermore, it includes different types of political regimes and developmental levels to test more widely the robustness of the patterns and variables highlighted in the original book. The case studies – covering countries from the United States, Canada, Germany and the UK to Russia, Togo and Vietnam – follow a uniform structure, combining theoretical considerations and the

presentation of empirical material to reveal how the distinct cultural and institutional features of modern states continue to have implications for the making and implementation of public policy decisions within them. The book is essential reading for students and scholars of public policy, public administration, comparative politics and development studies.

Public administration seeks to develop a comprehensive understanding of the internal structure and functioning of government, in all its complexity, and its interaction with society and its citizens. Public Administration: The Interdisciplinary Study of Government provides an account of the discipline, considering its history, growth, boundaries, and underlying assumptions. It tracks the emergence of the field against a background of the expanding conception of the state and the growth of public services, and situates it within the three branches of knowledge - natural sciences, social sciences, and humanities. It maps out the sources of knowledge of public administration, and how this is fragmented within the discipline's specializations, the social sciences, and government and society at large. It examines how leading authors map the discipline, the application of different theories, the associated schools of thought and intellectual debates, and the role of knowledge integration. Scholars in public administration have initiated much debate as to whether it should be treated as a science, a craft or profession, or an art. This book argues that to develop a comprehensive understanding of government and its complexity requires a truly interdisciplinary approach. Annual supplement University of

Canada ' s official languages legislation fundamentally altered the composition and operational considerations of federal institutions. With legislative change, Canada ' s public service has achieved the equitable representation of its two official languages groups, provided services to the public in both official languages, and has codified rights for public servants to work in their official language of choice. On paper, the regime is robust. In practice, there is a persistent

---

divergence between policy and practice, as English dominates as the regular language of work in the federal public service. Through an historical institutionalist lens based on extensive archival research and semi-structured interviews, Gaspard shows that the implementation of official languages policy in the federal public service from 1967 – 2013 could not challenge the predominance of English as the operating language of the federal public service. The analysis of the roles of actors, ideas and institutions that influenced the policy implementation process show that a lack of structural change, inadequate managerial engagement, and a false sense that both official languages are equally ingrained in the public service explain the persistence of English as the dominant language of work. This book is published in English. - La politique sur les langues officielles du Canada a transformé la composition et les considérations opérationnelles des institutions fédérales. Grâce aux modifications législatives, la fonction publique du Canada a réussi à mettre en place une représentation équitable de ses deux groupes de langues officielles, assure la prestation de services au

---

public dans les deux langues officielles, et a procédé à la codification des droits des fonctionnaires de travailler dans la langue officielle de leur choix. En théorie, le régime est robuste. En pratique, il existe un fossé entre politique et pratique, l'anglais s'établissant comme langue dominante de travail dans la fonction publique fédérale. En adoptant une approche historique à cette question institutionnelle et au moyen de recherches archivistiques et d'entrevues mi-structurées, Gaspard fait valoir que de 1967 à 2013, la mise en œuvre du programme de langues officielles à la fonction publique fédérale n'a pu influencer sur la trajectoire de l'anglais comme langue prépondérante de travail. L'analyse des rôles des intervenants et des institutions qui ont façonné le processus met en lumière le fait que l'absence de changements structurels, l'engagement insuffisant des gestionnaires, de même que la perception erronée que les langues officielles sont toutes deux bien ancrées dans la fonction publique se conjuguent pour expliquer la persistance de l'anglais comme principale langue de travail. Ce livre est publié en anglais.

In response to changes in internal needs, external organizational environments, and the expectations of shareholders – most notably, citizens and politicians – innovation is now an important common-place aspect of governance and the

running of public service organizations.

Given the ongoing financial and economic crisis, which presents a significant challenge to public service organizations (PSOs), there is a growing need to establish innovative strategies in order to survive the crisis, and provide the basis for future sustainable growth. This book contributes towards the discussion of PSO innovation through theoretically informed empirical studies of innovation across a range of theories, topics and fields. Studies examine the role of citizens, managers, and public service organizations; the adoption, diffusion, implementation, and management of innovations; collaboration, communication, and information technologies; and decision-making, ethical principles, HR management, leadership, and procurement. The studies – which examine the situation

Program Evaluation and Performance Measurement offers a conceptual and practical introduction to program evaluation and performance measurement for public and non-profit organizations. The authors cover the performance management cycle in organizations, which includes: strategic planning and resource allocation; program and policy design; implementation and management; and the assessment and reporting of results. The Third Edition has been revised to highlight the current economic, political, and socio-demographic context within which evaluators are expected to work, and includes dynamic public policy exemplars such as the evaluation of body-worn police cameras.

Over the past decade, the introspective, insular, and largely atheoretical style that informed Canadian political science for most of the postwar period has given way to a deeper engagement with, and integration into, the global field of comparative politics. This volume is the first sustained attempt to describe, analyze, and assess the "comparative turn" in Canadian political science. Canada's engagement with comparative politics is examined with a focus on three central questions: In what ways, and how

---

successfully, have Canadian scholars contributed to the study of comparative politics? How does study of the Canadian case advance the comparative discipline? Finally, can Canadian practice and policy be reproduced in other countries?

Collectively, provincial deputy ministers command the largest assembly of government budgets, employees, and influence in Canada, but despite their importance, they have not been the subject of systematic study until now. This unique volume, which deals with a uniquely significant topic, reviews the role of deputy ministers within government, providing a major new understanding of their responsibilities and interactions at both the federal and provincial levels. It also contributes important comparative

analysis not previously available. Featuring contributions by many of Canada ' s most prominent scholars of public administration, Deputy Ministers in Canada examines a number of factors in the evolution of deputies ' roles. Taking into account social, political, and administrative history, the essays probe topics such as the socio-economic characteristics of administrative elites, the politicization of recruitment processes, the impact of New Public Management, and varieties of ministerial-bureaucratic relations. Together, the essays in Deputy Ministers in Canada make an important contribution to the political science and public administration literature.

This book draws on recent empirical research and reports unique insight into the craft of public administration of the most senior echelons of the Australian Public Service (APS). This work is set in the context of a comparative analysis of the significant public sector reforms by successive governments from the 1980s across Westminster polities. Such reforms and the contemporary management ideas on which they were based, including new managerialism and

‘ new public management ’ (NPM) travelled, were translated and transformed with some elements accepted and others rejected. This book addresses how the most senior public servants in the APS construct their craft today amid such reforms. Chapter two covers the myriad of public sector reforms across Westminster polities. Chapters three and four cover the environments and contemporary management ideas which influence public administration. Chapters five and six showcase the public actors and the responsibilities they execute when they construct their craft. The final chapter provides a conceptual model

---

of the craft of public administration and provides implications for theory and practice.

This multiauthor reference handbook gives a detailed, objective picture of the evolution, structure, and processes of public administration in representative Third World countries. Written by an international group of specialists with first-hand knowledge of the subject, it presents empirical studies of developing nations in Asia, the Middle East, North and Sub-Saharan Africa, the West Indies, and Latin America. The resulting data are shaped by the editor into a theoretical framework delineating the complex

relationships of state, bureaucracy, and class in the Third World.

Subramaniam's introduction provides a critical overview of development literature in the field. Each case study begins with an historical introduction and discusses the political, executive, and the administrative structures and processes. Among the specific topics covered are public enterprises, administrative departments, personnel, financial administration, and regional and local administrative units. The majority of the systems studied are affected by the unregulated power of public enterprises, the persistence of colonial legacies, and the elitism of the bureaucracy. The concluding section relates these common elements to the

---

sociohistorical characteristics of the middle-class groups that dominate both politics and public administration.

Offering new research findings and a useful theoretical synthesis, this study will promote a clearer understanding of the internal political processes of Third World nations and be of compelling interest to specialists and students concerned with Third World political economy, comparative government, and international political economy.

The governing and financing of public education is everywhere a complex undertaking. The 1960s was for Ontario a vital decade in education, when the structure of local school boards, provincial and federal financing and

control, the provision of academic and vocational systems, and the Department of Education itself were all reconsidered and changed to attain greater efficiency and opportunity throughout the province. This is a detailed case study in intergovernmental relations focusing on provincial-local relations in education. It offers a perceptive insight into the nature of the political system in Ontario by presenting a clear and straightforward analysis of the formulation, content, and impact of provincial policy upon the provision of public education by local school boards. The text is divided into five parts. The first part is an analysis of the provincial-local context within which the policies of the provincial government were developed. The second deals with the Ontario Foundation Tax Plan, a programme of grants from the province to

---

the school boards. Part III is an analysis of two policies developed in a federal-provincial context: capital grants for the construction of vocational schools and the Ontario Education Capital Aid Corporation. Part IV examines three policies affecting the structure of educational government in Ontario: the consolidation of school districts in 1965, the reorganization of the Department of Education, and the further consolidation of school districts in 1969 into county units. In knitting together the highlights of the study, Part V pays special attention to the complex but revealing interrelationship between problems, policies, and the intergovernmental political system of Ontario, and shows how problems were resolved, ameliorated, or even exaggerated by the combined effect of the provincial and federal-provincial programmes. The focus then shifts to the years 1969 and 1970 to demonstrate the changed nature of provincial policy emerging from within an apparently changed context of provincial-local relations. Throughout the study the author's detailed knowledge and thorough understanding of the policies and processes of the educational system are evident. He presents a mine of statistical information combined with a remarkably keen and concise analysis of the administrative process. This study will be of great interest to educators, administrators, and students of intergovernmental relations.
