This book draws on recent

empirical research and reports unique insight into the craft of public administration of the most senior echelons of the Australian Public Service (APS). This work is set in the context of a comparative analysis of the significant public sector reforms by successive governments from the 1980s across Westminster polities. Such reforms and the contemporary management ideas on which they were based, including new managerialism and 'new public management' (NPM) travelled, were translated and transformed with some elements accepted and others rejected.

This book addresses how the most senior public servants in the APS construct their craft today amid such reforms. Chapter two covers the myriad of public sector reforms across Westminster polities. Chapters three and four cover the environments and contemporary management ideas which influence public administration. Chapters five and six showcase the public actors and the responsibilities they execute when they construct their craft. The final chapter provides a conceptual model of the craft of public administration and provides implications for theory and

practice.

The civil service provides the administrative infrastructure of western government. Its functions are central to any question of

efficiency, the distribution of power in the state, the role of the state in society and the operation of democracy itself. When such issues transcend national boundaries a comparative perspective is invaluable. This book provides the first comprehensive study of civil services in the West. Aimed at first year students and above, the book applies a common framework of analysis to the study of each country's political setting, historical background, political executive, structure, bureaucracy, control, accountability, management and policy-making. The book is a timely and comprehensive introduction to this vital but neglected area of study. Countries covered include: Britain, Ireland, Canada, France, Italy, Sweden, United States and West Germany.

The Interdisciplinary Study of Government
Oxford University Press, USA

This multiauthor reference handbook gives a detailed, objective picture of the evolution, structure, and processes of public administration in representative Third World countries. Written by an international group of specialists with first-hand knowledge of the subject, it presents empirical studies of developing nations in Asia, the Middle East, North and Sub-Saharan Africa, the West Indies, and Latin America. The resulting data are shaped by the editor into a theoretical framework delineating the complex relationships of state, bureaucracy, and class in the Third World. Subramaniam's introduction provides a critical overview of development literature in the field. Each case

study begins with an historical introduction and discusses the political, executive, and the administrative structures and processes. Among the specific topics covered are public enterprises, administrative departments, personnel, financial administration, and regional and local administrative units. The majority of the systems studied are affected by the unregulated power of public enterprises, the persistence of colonial legacies, and the elitism of the bureaucracy. The concluding section relates these common elements to the sociohistorical characteristics of the middle-class groups that dominate both politics and public administration. Offering new research findings and a useful theoretical synthesis, this study will promote a clearer understanding of the internal political processes of Third World

nations and be of compelling interest to specialists and students concerned with Third World political economy, comparative government, and international political economy.

In Search of Balance--Canada's Intergovernmental Experience Edward Elgar Publishing

Canada ' s official languages legislation fundamentally altered the composition and operational considerations of federal institutions. With legislative change, Canada ' s public service has achieved the equitable representation of its two official languages groups, provided services to the public in both official languages, and has codified rights for public servants to work in their official language of choice. On paper, the

regime is robust. In practice, there is a persistent divergence between policy and practice, as English dominates as the regular language of work in the federal public service. Through an historical institutionalist lens based on extensive archival research and semi-structured interviews, Gaspard shows that the implementation of official languages policy in the federal public service from 1967 – 2013 could not challenge the predominance of English as the operating language of the federal public service. The analysis of the roles of actors, ideas and institutions that influenced the policy implementation process show that a lack of structural change, inadequate managerial engagement, and a false sense that both official languages are equally ingrained in the public service explain the persistence of English as the dominant language of work. This book is published in English. - La politique sur les langues officielles du Canada a transform é la composition et les consid é rations op é rationnelles des institutions f é d é rales. Gr â ce aux modifications l é gislatives, la fonction publique du Canada a r é ussi à mettre en place une repr é sentation é quitable de ses deux groupes de langues officielles, assure la prestation de services au public dans les deux langues officielles, et a proc é d é à la codification des droits des fonctionnaires de travailler dans la langue officielle de leur choix. En th é orie, le r é gime est robuste. En pratique, il existe un foss é entre politique et pratique, l ' anglais s ' é tant é tabli comme langue dominante de travail dans la fonction

publique fédérale. En adoptant une approche historique à cette question institutionnelle et au moyen de recherches archivistiques et d'entrevues mi-structurées, Gaspard fait valoir que de 1967 à 2013, la mise en oeuvre du programme de langues officielles à la fonction publique fédérale n'a pu influencer sur la trajectoire de l'anglais comme langue prépondérante de travail. L'analyse des rôles des intervenants et des institutions qui ont façonné le processus met en lumière le fait que l'absence de changements structurels, l'engagement insuffisant des gestionnaires, de même que la perception erronée que les langues officielles sont toutes deux bien ancrées dans la fonction publique se conjuguent pour expliquer la persistance de l'anglais comme principale langue de travail. Ce livre est publié en anglais.

The Essential Readings CRC Press

Richardson et al. 's respected and seminal Policy Styles in Western Europe (1982) shed valuable light on how countries tend to establish long-term and distinctive ways to make policies that transcend short-term imperatives and issues. This follow-up volume updates those arguments and significantly expands the coverage, consisting of 16 carefully selected country-level case studies from around the world. Furthermore, it includes different types of political regimes and developmental levels to test more widely the robustness of the patterns and variables highlighted in the original book. The case studies – covering countries from the United States, Canada, Germany and the UK to Russia, Togo and Vietnam – follow a uniform structure, combining theoretical considerations and the presentation of empirical material to reveal how the distinct cultural and institutional features of modern states continue to have implications for the making and implementation

of public policy decisions within them. The book is essential reading for students and scholars of public policy, public administration, comparative politics and development studies.

With the direct participation of partisan political staff in governance, the onset of permanent election campaigns heavily dependent on negative advertising, and the expectation that the public service will not only merely implement but enthusiastically support the agenda of the elected government, we are experiencing a new form of political governance. The late Peter Aucoin (1943-2011) has argued that traditional norms of impartial loyalty have been displaced by partisanship on the part of civil servants and that the political executive is keen on directly controlling all aspects of communication and interaction between government and citizens.

The arrival of "New Political Governance" has a direct bearing on the long-standing tension between the need of ensuring democratic control over bureaucracy, while also allowing the public service sufficient flexibility to exercise discretion, judgment, and professional expertise when implementing and managing programs. Through a series of essays using Aucoin's "New Political Governance" framework, leading scholars in the field address the manner in which this tension and its conflicts have played out over the past decade in different domains. Contributors examine themes including accountability, democracy, public management and reform, the paradoxes of electoral democracy, and the dilemmas of democratic governance. The governing and financing of public education is everywhere a complex undertaking. The 1960s was for Ontario a vital decade in education, when the structure of local school boards, provincial and federal financing and control, the provision of academic and vocational systems, and the Department of Education itself were all reconsidered and changed to attain greater efficiency and opportunity throughout the province. This is a detailed case study in intergovernmental relations focusing on provincial-local relations in education. It offers a perceptive insight into the nature of

the political system in Ontario by presenting a clear and straightforward analysis of the formulation, content, and impact of provincial policy upon the provision of public education by local school boards. The text is divided into five parts. The first part is an analysis of the provincial-local context within which the policies of the provincial government were developed. The second deals with the Ontario Foundation Tax Plan, a programme of grants from the province to the school boards. Part III is an analysis of two policies developed in a federal-provincial context: capital grants for the construction of vocational schools and the Ontario Education Capital Aid Corporation. Part IV examines three policies affecting the structure of educational government in Ontario: the consolidation of school districts

in 1965, the reorganization of the Department of Education, and the further consolidation of school districts in 1969 into county units. In knitting together the highlights of the study, Part V pays special attention to the complex but revealing interrelationship between problems, policies, and the intergovernmental political system of Ontario, and shows how problems were resolved, ameliorated, or even exaggerated by the combined effect of the provincial and federal-provincial programmes. The focus then shifts to the years 1969 and 1970 to demonstrate the changed nature of provincial policy emerging from within an apparently changed context of provincial-local relations. Throughout the study the author's detailed knowledge and thorough understanding of the policies and processes of the educational system are evident. He presents a mine of statistical information combined with a remarkably keen and concise analysis of the administrative process. This study will be of great interest to educators, administrators, and students of intergovernmental relations.

Provinces is both a study of Canadian provincial government and a review of comparative politics. As such, it represents a long overdue return to the comparative tradition with its emphasis on subject-specific studies across the country. The chapters in this revised edition of *Provinces*, each of which has been written for the book by a leading scholar, are arranged according to four major sections: political life, institutions, public administration, and public policy. Making the book highly suitable for those interested in areas beyond provincial politics. At the same time, the adopted comparative approach reveals a wealth of insight into Canadian politics at the beginning of the new millennium. This new edition covers some of the vital concerns of our time: a disquiet about the quality of democracy, concern about women's place in provincial societies, interest in the nature and potential of governance in the north, unease on the question of the fiscal imbalance between all orders of government, a sensitivity to the needs of cities and communities, assessment of the retrenchment of the state, and consideration of the policy futures influenced by the changing demography of the provinces. Collectively, provincial deputy ministers command the largest assembly of government budgets, employees, and influence in Canada, but despite their importance, they have not been the subject of systematic study until now. This unique volume, which deals with a uniquely significant topic, reviews the role of deputy ministers within government, providing a major new understanding of their responsibilities and interactions at both the federal and provincial levels. It also contributes important comparative analysis not previously available. Featuring contributions by many of Canada's most prominent scholars of public administration, *Deputy Ministers in Canada* examines a number of factors in the evolution of deputies' roles. Taking into account social, political, and administrative history, the essays probe topics such as the socio-economic characteristics of

administrative elites, the politicization of recruitment processes, the impact of New Public Management, and varieties of ministerial-bureaucratic relations. Together, the essays in *Deputy Ministers in Canada* make an important contribution to the political science and public administration literature.

Canadian public administration has provided a rich ground for examining the changing nature of the state. Currents of political change have rippled through the administration of the public sector, often producing significant alterations in our understanding of how best to organize and administer public services. This volume brings together some of the leading Canadian and international scholars of public

administration to reflect on these changes and their significance. Providing a historical perspective on public administration in Canada, the volume examines the shift from a traditional model of administration to newer forms such as new public management and governance, and explores current debates and the place of Canadian public administration within a broader comparative perspective. Broken down into five sections explaining how public budgets are developed, Canadian Public Finance presents a comprehensive account of the budget process of the federal, provincial, and territorial governments. With a specific focus on the public policy process, Geneviève Tellier walks readers through the

five steps involved in the budget process including agenda-setting, formulation, adoption, implementation, and evaluation. Taking a close look at how much influence key decision-makers actually have over the budget process, Tellier highlights recent events that reveal the political, social, and economic constraints that impact budgetary decisions. Tellier uses key words and textboxes at the end of each chapter to reflect on current issues and new developments in the world of public finance, such as gender-sensitive budgets, performance-based budgeting, and fiscal transparency.
