This volume brings together some of the leading Canadian and international scholars of public administration to reflect on these changes and their significance. Providing a historical perspective on public administration in Canada, the volume examines the shift from a traditional model of administration to newer forms such as new public management and governance, and explores current debates and the place of Canadian public administration within a broader comparative perspective.

Broken down into five sections explaining how public budgets are developed, Canadian Public Finance presents a comprehensive account of the budget process of the federal, provincial, and territorial governments. With a specific focus on the public policy process, Geneviève Tellier walks readers through the five steps involved in the budget process including agenda-setting, formulation, adoption, implementation, and evaluation. Taking a close look at how much influence key decision-makers actually have over the budget process, Tellier highlights recent events that reveal the political, social, and economic constraints that impact budgetary decisions. Tellier uses key words and textboxes at the end of each chapter to reflect on current issues and new developments in the world of public finance, such as gender-sensitive budgets, performance-based budgeting, and fiscal transparency.

Within a theoretical perspective, the authors qualify their findings and take care not to over-generalise results. The findings are relevant to the practice of public administration. Specific areas addressed include understanding

Over the past decade, the introspective, insular, and largely atheoretical style that informed Canadian political science for most of the postwar period has given way to a deeper engagement with, and integration into, the global field of comparative politics. This volume is the first sustained attempt to describe, analyze, and assess the "comparative turn" in Canadian political science. Canada's engagement with comparative politics is examined with a focus on three central questions: In what ways, and how successfully, have Canadian scholars contributed to the study of comparative politics? How does study of the Canadian case advance the comparative discipline? Finally, can Canadian practice and policy be reproduced in other countries?

This book draws on recent empirical research and reports unique insight into the craft of public administration of the most senior echelons of the Australian Public Service (APS). This work is set in the context of a comparative analysis of the significant public sector reforms by successive governments from the 1980s across Westminster polities. Such reforms and the contemporary management ideas on which they were based, including new managerialism and 'new public management' (NPM) travelled, were translated and transformed with some elements accepted and others rejected. This book addresses how the most senior public servants in the APS construct their craft today amid such reforms. Chapter two covers the myriad of public sector reforms across Westminster polities. Chapters three and four cover the environments and contemporary management ideas which influence public administration. Chapters five and six showcase the public actors and the responsibilities they execute when they construct their craft. The final chapter provides a conceptual model of the craft of public administration and provides implications for theory and practice.

Canada's official languages legislation fundamentally altered the composition and operational considerations of federal institutions. With legislative change, Canada's public service has achieved the equitable representation of its two official languages groups, provided services to the public in both official languages, and has codified rights for public servants to work in their official language of choice. On paper, the regime is robust. In practice, there is a persistent divergence between policy and practice, as English dominates as the regular language of work in the federal public service. Through an historical institutionalist lens based on extensive archival research and semi-structured interviews, Gaspard shows that the implementation of official languages policy in the federal public service from 1967–2013 could not challenge the predominance of English as the operating language of the federal public service. The analysis of the roles of actors, ideas and institutions that influenced the policy implementation process show that a lack of structural change, inadequate managerial engagement, and a false sense that both official languages are equally ingrained in the public service explain the persistence of English as the dominant language of work. This book is published in English. - La politique sur les langues officielles du Canada a transformé la composition et les considérations opérationnelles des institutions fédérales. Grâce aux modifications législatives, la fonction publique du Canada a réussi à mettre en place une représentation équitable de ses deux groupes de langues officielles, assure la prestation de services au public dans les deux langues officielles, et a procédé à la codification des droits des fonctionnaires de travailler dans la langue officielle de leur choix. En théorie, le régime est robuste. En pratique, il existe un fossé entre politique et pratique, l'anglais s'étant établi comme langue dominante de travail dans la fonction publique fédérale. En adoptant une approche historique à cette question institutionnelle et au moyen de recherches archivistiques et d'entrevues mi-structurées, Gaspard fait valoir que de 1967 à 2013, la mise en oeuvre du programme de langues officielles à la fonction publique fédérale n'a pu influencer sur la trajectoire de l'anglais comme langue prépondérante de travail. L'analyse des rôles des intervenants et des institutions qui ont façonné le processus met en lumière le fait que l'absence de changements structurels, l'engagement insuffisant des gestionnaires, de même que la perception erronée que les langues officielles sont toutes deux bien ancrées dans la fonction publique se conjuguent pour expliquer la persistance de l'anglais comme principale langue de travail. Ce livre est publié en anglais.

With the direct participation of partisan political staff in governance, the onset of permanent election campaigns heavily dependent on negative advertising, and the expectation that the public service will not only merely implement but enthusiastically support the agenda of the elected government, we are experiencing a new form of political governance. The late Peter Aucoin (1943-2011) has argued that traditional norms of impartial loyalty have been displaced by partisanship on the part of civil servants and that the political executive is keen on directly controlling all aspects of communication and interaction between government and citizens. The arrival of "New Political Governance" has a direct bearing on the long-standing tension between the need of ensuring democratic control over bureaucracy, while also allowing the public service sufficient flexibility to exercise discretion, judgment, and professional expertise when implementing and managing programs. Through a series of essays using Aucoin's "New Political Governance" framework, leading scholars in the field address the manner in which this tension and its conflicts have played out over the past decade in different domains.
