This book explores the role of phonological templates in early language use from the perspective of usage-based phonology and exemplar models and within the larger developmental framework of Dynamic Systems Theory. After analysing children's first words and their adult targets, Vihman sets out procedures for establishing the children's later prosodic structures and templates, drawing on data from American and British English, Estonian, Finnish, French, Italian, and Welsh; she also provides briefer longitudinal accounts of template use in Arabic and Brazilian Portuguese. The children are found to begin with simple word forms that match their selected adult targets; this is followed by the production of more challenging words, adapted to fit the child's existing patterns. Early accuracy is replaced by later recourse to an 'inner model'--a template--of a favoured word shape. The book also examines the timing, fading, quantification, and function of child phonological templates. In addition, two chapters focus on the use of templates in adult language, in the core grammar and in the more creative morphology of colloquial 'short forms' and hypocoristics in French and Estonian and of English rhyming compounds. The idea of templates is traced back to its origins in Prosodic Morphology, but its uses are most in evidence in the informal settings of adult language 'at play'. Throughout the volume, the discussion returns to the issues of emergent systematicity, the roles of articulatory and memory challenges for children, and the similarities and differences in the function of templates for adults as compared with children.

An in-depth spiritual journey through the truths and traumas of one's past to a rebirth and renewal of personal wholeness. To the ancients, the goddess Hekate symbolized the inner journey back to the soul. Indeed, ancient philosophers identified her as Anima Mundi, the "soul of the world." As such, she connects many archetypes associated with the cycle of life, death, and rebirth. From her role as protector of roadways to her power as the bringer of death, she offers us keys for healing. Incorporating her personal experiences with those of her students, Cyndi Brannen weaves a supporting circle around the reader as they start their path towards soulful living, culminating in rebirth. Blending symbolism, transcendent experiences, dreams, and natural magic with sound psychological theories and practices, *Entering Hekate's Cave* guides the reader safely through the journey back to the soul.

Many modern surface coatings and adhesives are derived from fossil feedstocks. With fossil fuels becoming more polluting and expensive to extract as supplies dwindle, industry is turning increasingly to nature, mimicking natural solutions using renewable raw materials and employing new technologies. Highlighting sustainable technologies and applications of renewable raw materials within the framework of green and sustainable chemistry, circular economy and resource efficiency, this book provides a cradle-to-cradle perspective. From potential feedstocks to recycling/reuse opportunities and the de-manufacture of adhesives and solvents, green chemistry principles are applied to all aspects of surface coating, printing, adhesive and sealant manufacture.

This book is ideal for students, researchers and industrialists working in green sustainable chemistry, industrial coatings, adhesives, inks and printing technologies.

The Complete Fabric Artist's Workshop is a comprehensive source of all the newest and most popular fiber art techniques! It is a compilation of the best of Fabric Art Projects (Creative Publishing international, 2009) and Fabric Art Workshop (Creative Publishing international, 2007). This technique-driven book explores a wide range of new possibilities and materials available to fabric and journal artists. Each unique technique is presented with brilliant photography and step-by-step instructions. Experiments lead to discoveries. Amaze yourself with exciting fabrics you can fashion, using everyday products and the newest materials on the market. Then turn your works of art into a journal, a quilt, a wall hanging, a garment--whatever you desire. *The Complete Fabric Artist's Workshop* teaches techniques for altering the character and color of fabric to create truly personal pieces. Watch spontaneous designs develop when you try lasagna painting, monoprinting, splash and puddle, and other unique techniques. Burn your silk, rust your cottons, and distress your felt. For each technique, Susan has designed a project that makes the most of your newly crafted fabric. Fuse Angelina fibers into a colorful collage to wrap around plain jars or vases. Send your friends one-of-a-kind fabric postcards made with painted fusible web. Give the dining room cozy ambience with gossamer silk candle covers and monoprinted placemats. Go to work in style with your brayer-printed lunch bag and a quilted, painted folder briefcase. Accessorize an outfit with a designer necklace made of unique fabric beads or drape your neck with a to-die-for rust-dyed scarf. Whether you are an accomplished fabric artist or a novice who's eager to learn, you'll find *The Complete Fabric Artist's Workshop* extremely helpful and inspiring.

Creativity in Product Innovation describes a remarkable new technique for improving the creativity process in product design. Certain "regularities" in product development are identifiable, objectively verifiable and consistent for almost any kind of product. These regularities are described by the authors as *Creativity Templates*. This book describes the theory and implementation of these templates, showing how they can be used to enhance the creative process and thus enable people to be more productive and focused. Representing the culmination of years of research on the topic of creativity in marketing, the *Creativity Templates* approach has been recognized as a breakthrough in such journals as *Science*, *Journal of Marketing Research*, *Management Science*, and *Technological Forecasting and Social Change*.

The I-Series leads the student through clear, error-free, and unambiguous steps to accomplish tasks that produce a finished document, work sheet or database table. The approach is not simply results-oriented; teaching how to accomplish a task is not enough for complete understanding and mastery. Prior to introducing steps, the authors discuss why each step is important and what roll all the steps play in the overall plan for creating a document, workbook or database. The I-Series Applications textbooks strongly emphasize that students learn and master applications skills by being actively engaged by doing.
