A memoir in bite-size chunks from the author of the viral Modern Love column “ You May Want to Marry My Husband. ” “ [Rosenthal] shines her generous light of humanity on the seemingly humdrum moments of life and shows how delightfully precious they actually are. ” —The Chicago Sun-Times How do you conjure a life? Give the truest account of what you saw, felt, learned, loved, strived for? For Amy Krouse Rosenthal, the surprising answer came in the form of an encyclopedia. In Encyclopedia of an Ordinary Life she has ingeniously adapted this centuries-old format for conveying knowledge into a poignant, wise, often funny, fully realized memoir. Using mostly short entries organized from A to Z, many of which are cross-referenced, Rosenthal captures in wonderful and episodic detail the moments, observations, and emotions that comprise a contemporary life. Start anywhere—preferably at the beginning—and see how one young woman ’ s alphabetized existence can open up and define the world in new and unexpected ways. An ordinary life, perhaps, but an extraordinary book.

He may have met Tommy Halloran in the world of gay-for-pay—where the number of lovers doesn’t matter as long as the come-shot’s good—but if he wants the healing that Tommy’s love has to offer, he’ll need the courage to leave the shadows for the sunlight. From a co-founder of Pixar Animation Studios—the Academy Award – winning studio behind Coco, Inside Out, and Toy Story—comes an incisive book about creativity in business and leadership for readers of Daniel Pink, Tom Peters, and Chip and Dan Heath. NEW YORK TIMES BESTSELLER | NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Huffington Post • Financial Times • Success • Inc. • Library Journal Creativity, Inc. is a manual for anyone who strives for originality and the first-ever, all-access trip into the nerve center of Pixar Animation—into the meetings, postmortems, and “ Braintrust ” sessions where some of the most successful films in history are made. It is, at heart, a book about creativity—but it is also, as Pixar co-founder and president Ed Catmull writes, “ an expression of the ideas that I believe make the best in us possible. ” For nearly twenty years, Pixar has dominated the world of animation, producing such beloved films as the Toy Story trilogy, Monsters, Inc., Finding Nemo, The Incredibles, Up, WALL-E, and Inside Out, which have gone on to set box-office records and garner thirty Academy Awards. The joyousness of the storytelling, the inventive plots, the emotional authenticity: In some ways, Pixar movies are an object lesson in what creativity really is. Here, in this book, Catmull reveals the ideals and techniques that have made Pixar so widely admired—and so profitable. As a young man, Ed Catmull had a dream: to make the first computer-animated movie. He nurtured that dream as a Ph.D. student at the University of Utah, where many computer science pioneers got their start, and then forged a partnership with George Lucas that led, indirectly, to his co-founding Pixar in 1986. Nine years later, Toy Story was released, changing animation forever. The essential ingredient in that movie ’ s success—and in the thirteen movies that followed—was the unique environment that Catmull and his colleagues built at Pixar, based on leadership and management philosophies that protect the creative process and defy convention, such as: • Give a good idea to a mediocre team, and they will screw it up. But give a mediocre idea to a great team, and they will either fix it or come up with something better. • If you don ’ t strive to uncover what is unseen and understand its nature, you will be ill prepared to lead. • It ’ s not the manager ’ s job to prevent risks. It ’ s the manager ’ s job to make it safe for others to take them. • The cost of preventing errors is often far greater than the cost of fixing them. • A company ’ s communication structure should not mirror its organizational structure. Everybody should be able to talk to anybody.

Sometimes life is like a movie. There are moments and events in life - not often - that are as exciting and as dramatic as a movie. What happened in Lake Placid, New York in February 1980 at the Thirteenth Winter Olympics was such a time. For those who experienced it in person or watched the games on television, they remember where they were when the US hockey team beat the Soviet Union and then beat the team from Finland two days later to win the gold medal. The sports victory of an underdog group of college kids was thrilling enough but it was a win against the Soviet Union. This Cold War adversary was also the nation hosting the summer games later that year which the United States was threatening to boycott. The excitement and drama in Lake Placid gave the games a huge lift of enthusiasm and popularity when some had even come to believe that staging the Olympics was no longer affordable for many communities and that perhaps the 1980 Winter Games should be cancelled entirely. Indeed, as the games began, a US News and World Report magazine questioned whether the Lake Placid games were the "last Olympics." What happened on the hockey ice was improbable enough, but the Lake Placid Winter Games were a long shot, if not a miracle too. Winning the games had been an unlikely decades-long quest for this small town to overcome the barriers of exploding finances, environmental concerns and world politics. Few remember that the 1980 games were never supposed to take place in Lake Placid. They came to the small village because of unexpected events which unfolded and made the two weeks in the remote Adirondacks before a worldwide audience of nearly a billion viewers one of the most dramatic times in the modern era of sports, media and politics. It would not be too much of a stretch to say that the Lake Placid Games, which brought the "Miracle on Ice," saved the Winter Olympics in 1980 and greatly enhanced them for the future.

I didn't plan on him.... Or for him. Or anything that had to do with Cal Donovan from Boston. Meeting him had been a complete and utter surprise, taking me completely off guard. I met new people every single day in my line of work and none of them affected me. Wasn't that the way of things though? You could meet a thousand people and none of them would mean anything to you, but then you'd meet one and they suddenly meant everything. I was a self-professed workaholic. When did making yourself your number one priority become such a horrible thing? I wasn't entirely sure, but I learned fairly quickly after my last breakup that men didn't like being second on a woman's priority list. And they seemed to be intimidated by a motivated female, calling me things like "hard to handle," "challenging," and "difficult." Being single seemed to work best for me and I had no plans on changing my relationship status anytime soon. And then
