When Canon entered the digital professional photography market, the Powers That Be decided they would compromise between the smaller sensor that Nikon used and the full-frame sensor Kodak was using for its short-lived pro DSLR line. The Canon EOS 1D definitely was a success and still is sought after, The designers at Canon, though, couldn't seem to let go of the full-frame sensor idea. Scarcely a year after the 1D, the company released the Canon EOS 1DS in late 2002. And it was/is a fantastic pro camera. Around two years later, the Canon EOS 1DS Mark II hit the shelves and it was just that much better. Both cameras still are viable options at low cost for using a pro DSLR camera. They're a lot of fun, too.

Some photographers make portraits that we can't take our eyes off of. These images create mood, evoke emotion, and pique our curiosity. They have that certain something that other portraits seem to lack. These rare images are memorable—the kind of shots that clients want and photographers strive to emulate. These portraits are technically precise and have style. Neil van Niekerk is a big name in the portrait and wedding photography industry. His masterful photographs get a reaction, and he's devoted to helping others create compelling portraits for their clients. In this book, van Niekerk shows readers strategies for creating a wide range of portrait looks (romantic, fun, sweet, dramatic, glamorous, or moody) in lackluster, middle-of-nowhere locales, small home studios, big expanses, and even on rooftops. Starting with traditional lighting and posing strategies and moving through “spicier” varieties, he shows readers how integrating specialized lighting (rim lighting, backlighting, flare, and low-key lighting—using natural light and artificial sources) and compositional approaches (shallow depth of field, lens compression, and unorthodox perspectives) into their creative approach can allow them to take full creative control over their portrait-taking process so that they're able to deliver incredible shots of their clients in any photographic conditions.
