In the last few years, digital SLR cameras have taken the astrophotography world by storm. It is now easier to photograph the stars than ever before! They are compact and portable, flexible to adapt with different lenses and for telescope use, and above all DSLR cameras are easy and enjoyable to use. In this concise guide,

---

experienced astrophotographer and expert Michael Covington outlines the simple, enduring basics that will enable you to get started, and help you get the most from your equipment. He covers a wide selection of equipment, simple and advanced projects, technical considerations and image processing techniques. Unlike other astrophotography books, this one focuses specifically on

DSLR cameras, not astronomical CCDs, non-DSLR digital cameras, or film. This guide is ideal for astrophotographers who wish to develop their skills using DSLR cameras and as a friendly introduction to amateur astronomers or photographers curious about photographing the night sky. This is a book about photographing low-light and indoor sports—not as a professional working for a major sports publication or

website—but as a parent or friend trying to capture a great memory. In *Photographing Indoor Sports*, author and photographer Alan Hess takes you through the basics of shooting basketball in the gym, martial arts at a dojo, water polo inside, and night football games under the lights.

*Photographing* these sports can be a challenge, because you need to use action-stopping shutter speeds without a lot of light. This means using lenses that open as wide as possible and ISO

settings that can introduce a lot of digital noise. This book covers all of these techniques to help you get that ideal sports shot in low light—and hopefully have some fun along the way. Follow along with Alan and you will: Learn how to handle low-light scenarios by adjusting your White Balance setting, noting where the lights are the brightest, and watching as the action crosses into different areas. Understand the importance of using a wide-open lens with a high ISO setting to get the right exposure
