Successful nature photographer and lecturer Charles Needle often asks students in his workshops if they understand the difference between "looking" and "seeing". The difference he is pointing out is that while we are constantly "looking" at countless people, places and things, we might not be actually seeing what is right in front of us. Being tuned into this difference can elevate your art as a photographer, allowing you to be more in tune with your surroundings. Needle has applied this concept to his work and it shows. Utilizing macro photography to capture the nuances of the nature all around us. In this extensive handbook, Needle covers not only his philosophy for seeing and capturing nature photography but delves into the equipment he uses. Needle covers composition, flash techniques, the fundamentals of macro photography and so much more. The book features many set-up shots, equipment shots and sequential shots detailing the progression towards creating the final images. This essential text provides both the inspiration and the technique required to beautifully capture the wonders of nature.

On Feb. 7, 1991, during Operation Desert Storm, a Bradley and an M113 were destroyed by 2 Hellfire missiles fired from an Apache helicopter. Two U.S. soldiers were killed, and 6 others were wounded in the incident. This report provides a detailed discussion of the incident, including related events and factors that contributed to it, and an analysis of the U.S. Army's investigation of the incident. It addresses: whether equipment failure caused the incident, the Apaches' performance, and whether the name of the Apache gunner was improperly released to the press.

The Routledge Guide to Interviewing sets out a well-tested and practical approach and methodology: what works, difficulties and dangers to avoid and key questions which must be answered before you set out. Background methodological issues and arguments are considered and drawn upon but the focus is on what is ethical, legally acceptable and productive: Rationale (why, what for, where, how) Ethics and Legalities (informed consent, data protection, risks, embargoes) Resources (organisational, technical, intellectual) Preparation (selecting and approaching interviewees, background and biographical research, establishing credentials, identifying topics) Technique (developing expertise and confidence) Audio-visual interviews Analysis (modes, methods, difficulties) Storage (archiving and long-term preservation) Sharing Resources (dissemination and development) From death row to the mansion of a head of state, small kitchens and front parlours, to legislatures and presbyteries, Anna Bryson and Se á n McConville ' s wide interviewing experience has been condensed into this book. The material set out here has been acquired by trial, error and reflection over a period of more than four decades. The interviewees have ranged from the delightfully straightforward to the painfully difficult to the near impossible – with a sprinkling of those that were impossible. Successful interviewing draws on the survival skills of everyday life. This guide will help you to adapt, develop and apply these innate skills. Including a range of useful information such as sample waivers, internet resources, useful hints and checklists, it provides sound and plain-speaking support for the oral historian, social scientist and investigator.

In his sixth book, renowned photographer, popular instructor, and best-selling author Bryan Peterson challenges and inspires us to see close-up photography in new ways when we view it through his eyes. You ' ve seen the dewdrops, but what about dewdrops on a bird ' s wing or raindrops on a car windshield? You ' ve seen the bumblebees on vibrant flowers, but what about the fluid edge of just one petal or the colorful rusting metal at industrial sites? Even when Peterson does capture the more traditional subjects, it's done in untraditional ways – and often with minimal specialized equipment! Most important, he moves beyond the commonplace to inspire new ways of getting close, using your lenses, and discovering unconventional subjects.
