Meeting a friend after many years' separation, the narrator wonders whether the events they both lived through in Lebanon really took place. Time and distance give a sense of unreality but when the narrator and Ali meet at Heathrow Airport, after seventeen years, the past slowly begins to unfold. Like so many other Palestinians who were born in the Lebanon, they had to leave in the mid-1980s, when it became a battlefield for different militias and armies – Lebanese, Palestinian, Israeli and Syrian. Ali leaves for America and, two years later, the narrator leaves for London. Their memories are concentrated on one fatal night when they and two other friends are together for the last time, before tragedy strikes. But for the narrator, a personal tragedy had struck much earlier, one which he would never forget and could not share.

Read straight from the heart through the eyes of Terry A. Roberts' hand written letters home to family from the front lines as he relays his fears,

frustrations, trials and triumphs. This work chronicles the gritty and often harsh expedition of one man in three wars as both an enlisted Marine and later as a Navy/Marine Corps Chaplain with the ever present Hand of God leading his every boot step. This patriot odyssey begins with the rigors of Marine Corps boot camp in Parris Island, South Carolina and from here it journals his journey through the dirt, dust, mud and mire of various deployments to include the first Gulf War in 1990-91, to the invasions of Iraq and Afghanistan with tributes to fallen brothers-in-arms and a family military heritage going back generations to the American Revolution.

As the need for geographical data rapidly expands in the 21st century, so too do applications of small-format aerial photography for a wide range of scientific, commercial and governmental purposes. Small-format Aerial Photography (SFAP) presents basic and advanced principles and techniques with an emphasis on digital cameras. Unmanned platforms are described in considerable detail, including kites, helium and hot-air blimps, model airplanes, and paragliders. Several case studies, primarily drawn from the geosciences, are presented to demonstrate how SFAP is actually used in various applications. Many of these integrate SFAP with ground-based investigations as well as conventional large-format aerial photography, satellite imagery, and other kinds of geographic information. Full-color photographs throughout Case studies from around the globe Techniques presented allow for image resolution impossible to match via traditional aerial photography or satellite datasets Glossary clarifies key terms
