DO YOU WISH TO KNOW GOD'S LOVE AS HE COMFORTS YOU? DO YOU WANT TO KNOW HOW GOD HAS HELPED OTHERS THROUGH THEIR TRIALS AND TRIBULATIONS? In Life Support, the author has approached a multitude of topics: aging, anger, pride, changing your attitude, learning to be content, dealing with guilt, finding joy, and knowing God more as you walk with Him. In God's comfort, we find He has all the same emotions you do, and one should derive a sense of joy from this knowledge, even when facing harsh realities such as death and loss. With the help of God, you have the ability to make your life all it can be! You may look back at the window of the past or look forward to the door of the future! Which will it be? It's your choice! The questions presented in Life Support will allow you to start your own Life Support Class, where you and others can learn how to make better decisions and have more faith than you ever had before.

PC World

In recent years, computer vision is a fast-growing technique of agricultural engineering, especially in quality detection of agricultural products and food safety testing. It can provide objective, rapid, non-contact and non-destructive methods by extracting quantitative information from digital images. Significant scientific and technological advances have been made in quality inspection, classification and evaluation of a wide range of food and agricultural products. Computer Vision-Based Agriculture Engineering focuses on these advances. The book contains 25 chapters covering computer vision, image processing, hyperspectral imaging and other related technologies in peanut aflatoxin, peanut and corn quality varieties, and carrot and potato quality, as well as pest and disease detection. Features: Discusses various detection methods in a variety of agricultural crops Each chapter includes materials and methods used, results and analysis, and discussion with conclusions Covers basic theory, technical methods and engineering cases Provides comprehensive coverage on methods of variety identification, quality detection and detection of key indicators of agricultural products safety Presents information on technology of artificial intelligence including deep learning and transfer learning Computer Vision-Based Agriculture Engineering is a summary of the author's work over the past 10 years. Professor Han has presented his most recent research results in all 25 chapters of this book. This unique work provides students, engineers and technologists working in research, development, and operations in agricultural engineering with critical, comprehensive and readily accessible information. It applies development of artificial intelligence theory and methods including depth learning and transfer learning to the field of agricultural engineering testing.
