Described as "Who owns whom, the family tree of every major corporation in America," the directory is indexed by name (parent and subsidiary), geographic location, Standard Industrial Classification (SIC) Code, and corporate responsibility.

Statement of Disbursements of the House as Compiled by the Chief Administrative Officer from ...

This book traces the history of liquid crystal display (LCD) development from simple laboratory samples to the flat, thin LCDs that have become an important part of everyday life, appearing in television screens, computers, and cellular phones as well as numerous other consumer and industrial products. It provides insight into how these products were developed and what might be expected in the future. This account is a personal, in-depth look at the evolution of a high-technology industry from the eyes of the author, who watched it grow from inception to ubiquity over nearly forty years. The story that is told in this book goes beyond the technical details and into the ideas, visions, struggles, deceptions, and ambitions of the scientists and engineers who made it possible. In addition, the diverse field of LCD technology encompasses not only electronics but also physics, chemistry, mechanical engineering, electrical engineering, marketing, and sales. Consequently, this book will be of interest to physical scientists from several disciplines as well as engineers and students.
