Requiring heterogeneous information systems to cooperate and communicate has now become crucial, especially in application areas like e-business, Web-based mash-ups

and the life sciences. Such cooperating systems have to automatically and efficiently match, exchange, transform and integrate large data sets from different sources and of different structure in order to enable seamless data exchange and transformation. The book edited by Bellahsene, Bonifati and Rahm provides an overview of the ways in which the schema and ontology matching and mapping tools have addressed the above requirements and points to the open technical challenges. The contributions from leading experts are structured into three parts: large-

scale and knowledge-driven schema matching, quality-driven schema mapping and evolution, and evaluation and tuning of matching tasks. The authors describe the state of the art by discussing the latest achievements such as more effective methods for matching data, mapping transformation verification, adaptation to the context and size of the matching and mapping tasks, mapping-driven schema evolution and merging, and mapping evaluation and tuning. The overall result is a coherent, comprehensive picture of the field. With this book, the editors

introduce graduate students and advanced professionals to this exciting field. For researchers, they provide an up-to-date source of reference about schema and ontology matching, schema and ontology evolution, and schema merging.

The twenty-first century has

given rise to a growing interest in the intersection of science, religion, and spirituality. Few books address these issues from multiple perspectives and theories. To fill this void, F. LeRon Shults and Steven Sandage, coauthors of *The Faces of Forgiveness* (winner of the Narramore Award from the Christian Association for Psychological Studies) continue their interdisciplinary dialogue in their latest work, *Transforming Spirituality*. In this book Shults and Sandage address the subject of spiritual transformation through the lenses of psychology and

theology. In addition to college and seminary students, *Transforming Spirituality* will appeal to readers interested in Christian spirituality. What is more, it provides helpful insights for counselors, psychologists, and others who work in the mental health field.

While forgiveness has historically been regarded as a religious concern, it has also become a popular topic in contemporary psychology. Unfortunately, there has been little effort to combine a Christian understanding of

forgiveness with psychology. *The Faces of Forgiveness*, winner of the Narramore Award from the Christian Association for Psychological Studies, steps in to fill this void. The authors fuse Christian forgiveness and psychology with the unifying motif of the face; thereby building on the considerable psychological research linking emotions related to forgiveness with the human face. At a deeper level, the face can serve as a metaphor for integrating forgiveness, wholeness, and salvation. The authors argue that forgiveness should take a

central role in our understanding of salvation because it is warranted by the Bible and engages our postmodern context. Pastors, psychologists, family counselors, and students of psychology and theology will find *The Faces of Forgiveness* a helpful resource. the Messiah. They narrate the climax and turning point in human history, when God acted decisively to achieve salvation for people everywhere. To study the Gospels is to study the foundation of Christianity.

Jeannine Brown, a seasoned teacher of biblical interpretation, believes that communication is at the heart of what happens when we open the Bible. We are actively engaging God in a conversation that can be life changing. In this guide to the theory and practice of biblical hermeneutics, Brown emphasizes the communicative nature of Scripture, proposing a communication model as an

effective approach to interpreting the Bible. The new edition of this successful textbook has been revised and updated to interact with recent advances in interpretive theory and practice.
