This book approaches the topic of contextual evangelization from the standpoint of Ò the poor, the powerless, and the oppressed. Ó It is, as Orlando Costas explains, Ó written against the backdrop of the radical evangelical tradition in dialogue with other streams of the larger ecumenical church. Ó Costas begins by exploring the biblical roots of contextual evangelization, focusing on two models. The Old Testament model is illustrated by believers like Esther, who, in her heroic liberation of her people in politically difficult circumstances, showed us how to come to the aid of those who live on the margins of society. The New Testament model is illustrated first and foremost by Christ, who showed us how to minister to the maginalized by operating from Ò the Galilean periphery. Ó On what does one base contextual evangelization? On the Trinity, which Costas defines as community, the foundation for evangelization as a Ò communal event. Ó The substance of evangelization is Ò the apostolic message of the cross, Ó which announces God's gift of life through the suffering and death of Christ. If we believe that message, we look foreward to life in God's kingdom even as we work and pray for justice and peace. Costas accordingly views conversion not as a single event but rather as a continual transformative process that involves a passage from self-absorption to active communal commitment. Costas's creative, sound blend of evangelical commitment and enlightened social thinking recommends this book to well-informed laypeople as well as pastors, theologians, and scholars.

Mulla Sadra is one of the most important Islamic philosophers after Avicenna. In this exploration of his philosophy, Sajjad H. Rizvi examines the central doctrine of the modulation of being, and contextualises his work within the intellectual history of philosophical traditions in the Islamic East. Reading and critiquing the works of Mulla Sadra from an analytical perspective, this book pays particular attention to his text the Asfar, a work which, due to its complexity, is often overlooked. Looking at the concept of philosophy as a way of life and a therapeutic practice, this book explores the paradigm of the modulation of being in the philosophical method and metaphysics of Mulla Sadra and considers its different manifestations. Rizvi relates his philosophy to larger trends and provides a review of the field, charting and critiquing the discussion on the topic to date and exploring recent thought in this direction, to show how Sadrian thought was addressed well into the 19th and 20th centuries. This major contribution to the study of Mulla Sadra and the intellectual life of the Safavid period fills an important gap in the field of Sadra studies and Islamic philosophy, and is indispensable to students of philosophy, religion and Islamic studies, and Islamic philosophy in particular.

Digital SLR Cameras and Photography For Dummies

The growth of what some academics refer to as 'the policy analysis movement' represents an effort to reform certain aspects of government behaviour. The policy analysis movement is the result of efforts made by actors inside and outside formal political decision-making processes to improve policy outcomes by applying systematic evaluative rationality to the development and implementation of policy options. This volume offers a comprehensive overview of the many ways in which the policy analysis movement has been conducted, and to what effect, in Canadian governments and, for the first time, in business associations, labour unions, universities, and other non-governmental organizations. Editors Laurent Dobuzinskis, Michael Howlett, and David Laycock have brought together a wide range of contributors to address questions such as: What do policy analysts do? What techniques and approaches do they use? What is their influence on policy-making in Canada? Is there a policy analysis deficit? What norms and values guide the work done by policy analysts working in different institutional settings? Contributors focus on the sociology of policy analysis, demonstrating how analysts working in different organizations tend to have different interests and to utilize different techniques. They compare and analyze the significance of these different styles and approaches, and speculate about their impact on the policy process.
