Art Wolfe ’ s immersive photos capture the wonder humans have felt about trees for millennia. From the ancient Assyrian Tree of Life to the Iroquois peoples ’ Tree of Peace, trees have played an archetypal role in human culture and spirituality since time immemorial. An integral part of a variety of faiths—from Buddhism and Hinduism to Nordic and aboriginal religions—trees were venerated long before any written historical records existed. This sense of reverence and wonder is beautifully evoked in these vivid images from legendary photographer Art Wolfe. The new, giftable format of his celebrated book on the topic, *Trees*, focuses on both individual specimens and entire forests, offering a sweeping yet intimate look at an arboreal world that spans six continents. To accompany these timeless images, author Gregory McNamee weaves a diverse and global account of the myths, cultures, and traditions that convey the long-standing symbiosis between trees and humans, and renowned ethnobotanist Wade Davis anchors the text with a penetrating introduction. Humans have always shared this planet with trees, and this book is both a breathtaking journey through and an homage to that relationship and its past, present, and future—now in a new, beautiful, and highly giftable format.

Excerpt: Introduced in 1987, the EF lens mount is the standard lens mount on the Canon EOS family of SLR film and digital cameras. EF stands for "Electro-Focus" automatic focusing on EF lenses is handled by a dedicated electric motor built into the lens. Mechanically, it is a bayonet-style mount, and all communication between camera and lens takes place through electrical contacts; there are no mechanical levers or plungers. In 2003, Canon introduced the EF-S lens mount, a derivative of the EF mount that is strictly for digital EOS cameras with a 1.6x crop released after 2003. EF lenses can be mounted on EF-S bodies but may not work on all function settings resulting in...

Digital photo contests are hot, hot, HOT--and this savvy guide reveals the inside secrets and technical advice photographers need to find--and win--the best competitions. Jeff Wignall covers all aspects of this rising phenomenon, from finding safe and trustworthy contests to taking visually impressive and emotionally powerful photos that will catch the judges’ eyes. In addition to prizes, these contests provide digital photographers with a unique and unprecedented opportunity to showcase their work, and Wignall maps out how to take advantage of this exciting trend. He also includes one-on-one interviews with key contest owners and judges to get the behind-the-scenes scoop on why a particular photo won. The features contests include: Digital Image Cafe, National Wildlife Federation, Kodak, Steve’s Digicams, Popular Photography, Smithsonian Magazine, Wet Pixel, and many more. Well over 100 original contest-winning images appear throughout the book, with commentary from the contributing photographers on their specific style and shooting techniques.

The British Journal of Photography GMC PUBLICATIONS LTD
Photographer and writer Shawn M. Tomlinson, author of the Photo Curmudgeon column and books, makes creating black and white and toned photos simple with this how-to guide. "In a world dominated by colorful images, black and white and toned photographs can stand out as something different, something somehow more beautiful," Tomlinson writes. "To really work in the 21st century, a black and white or toned image must be special. It must express something not there in color. There must be a reason to change the reality of the image by turning it grayscale, not just that you can. All that said, there is absolutely nothing like a truly great black and white image." The author covers the basics of B&W and toned photos including processing techniques, printing, presentation in eBooks, and much more. This is an expanded and revised edition of the original eBook.
