Canon became the first to build the motor that drives the focus inside each lens, rather than using a motor inside the camera body. Even with continued development and evolution of focusing systems, Image Stabilizer technologies, specialist lens elements and weather sealing, the original EF mount design remains unchanged.

The EOS RP works flawlessly with Canon EF Lenses on Canon EF Lens Adapters because all the electronics talk to each other properly. However, with Canon FD and other random manual-focus lenses on random adapters there are no electronic contacts so the EOS RP thinks there is no lens attached and won't take pictures.
