Photographer/writer Shawn M. Tomlinson explains the reasons why you need a second DSLR camera, and how to choose one. "The point is that, as a photographer, your DSLR is your main instrument or tool," Tomlinson writes. "You need to be so familiar with it that it is automatic for you to get it to do what

you want." He covers the basics of buying and working with a second DSLR, illustrating points with many photos. In part two, 'The Workhorse DSLR: Revisiting the Canon EOS 20D,' he explains in detail the joys of this great camera. "Still, it all comes back to the 20D. It was and is a workhorse of a DSLR, mostly metal and rugged, and it produces spectacular images. I use mine frequently. Sure, it has a little more grain than

my newer DSLRs, but grain is not a bad thing. The colors are fantastic, as are those produced by most Canon cameras." The author covers the basics of buying and working with the Canon EOS 20D, illustrating points with many photos from that DSLR.

In 'Getting Started in Photography,' Photographer and writer Shawn M. Tomlinson creates a quick guide to help budding photographers. The book includes equipment advice,

exercises for becoming better, photo processing basics and more. From the book: "What anyone starting out needs is, well, a starting point. Some basic information about equipment and technique to get everything moving. And, hey, I'm here to help." In part two, 'Great Starter DSLR: Revisiting the Sony A100,' he takes an in-depth look at the camera and continues his series devoted to helping budding photographers get started without breaking the bank. In this case, Tomlinson considers the first Sony DSLR, the A100. From the book: "After waiting the proper mourning time for Minolta -

about a year - Sony took the black armband off and unveiled its first DSLR, the A100. And why is this important now? It's vitally important if you are a beginning photographer and want to get a great DSLR and great lenses that won't mortgage your house."
