The EOS D30 introduced the CMOS sensor developed by none other than Canon. Get a better picture with more definition, 3.11 million pixels to be exact. We've improved upon the previous CCD imaging elements by implementing a CMOS sensor that delivers high-quality images without eating up your battery supply.

CANON POWERSHOT D30 USER MANUAL Pdf Download | ManualsLib The D30 comes fully loaded, filled with features and functionality you'd expect of a

camera teetering on the edge of wearing a "Pro" badge (and probably more deserving than some of those that do), add to this the fact that Canon threw a curved ball by using the first ever multi-megapixel CMOS sensor to be seen in a production camera and you can see why the EOS-D30 is significant.

Thank you for purchasing a Canon product. The EOS 30D is a high-performance, digital AF SLR camera with a large, fine-detail, 8.20-megapixel CMOS sensor. The camera has nine high-precision AF points, and it is compatible with all Canon EF lenses (including the EF-S lenses). Designed for quick shooting at all times,

Canon's manual implies that you have to choose a non-default "disable" in order to repeat a bracket sequence. I think this was lost in translation, you can repeat sequences in any setting. 10: Superimposed Display (Red AF Sensor Lights) let you turn off the red AF sensor lights in the finder.
