As a beginner or professional photographer or filmmaker, you don't need to struggle to figure out how to use the Canon EOS Rebel T8i/850D if you can take the step to purchase this book. Early February in 2020, Canon, arguably the best camera producer in the globe today and a giant creator of digital solutions, revealed the aesthetic Canon EOS Rebel T8i/850D, a beauty that speaks more pleasantly than its tag - Rebel. The camera was unveiled as a high-performing device and brandished with high-quality features. The picturing device is easily Canon's most populous Digital Single-Lens Reflex (DSLR) camera line manufactured in the last few years. Likewise, the most intriguing aspect of it is that it gives a soft landing to those who are previously most exposed to Smartphones and other picturing devices. This leverage means that neophytes do not have to bother themselves with getting abreast with the technicalities of the camera. Canon, with this design, has provided an incredible performance level, which gives users control over the device. It has also been given an affordable and supportive setup for beginners and more experienced users. Embodied in the Canon EOS Rebel T8i/850D is a 24.1-megapixel Advanced Photo System type-C (APS-C) size sensor which is similar to the kind of sensor found in one of Canon's top designs, the T7i camera. Although, the image quality between both cameras is nearly identical, with the T8i given a little nudge. However, as an advantage, Canon placed in the T8i a DIGIC eight image processor which allows for the filming of Ultra High Definition (UHD) 4k video at 24 frames per second. A preview of what you will get if you purchase this book include; Unleashing the Canon EOS Rebel T8i/850D Exploring and Mounting Lenses Tour of the Canon EOS Rebel T8i/850d External Features/Buttons Shooting Features and Menu Basics Exposure Modes and Creative Control Playback Features and Functions Playback Mode and Settings Multi-image Display Jumping Images Rotating an Image Shooting Review Time Histogram Information Display Protecting Images Resizing and Cropping Images The Red-Eye Effect Processing a Raw Image Computer Processing Camera Processing Sending Pictures to Computers Importing Pictures via Cables or Card Readers Importing Pictures via Wi-Fi Useful Camera Tips Time-Lapse Recording Trim the Beginning and End of a Movie Mirror Lock-Up (Mlu) Slide Shows Create Video Snapshots Change the Video System for a Television (TV) Mirror Images from the Camera to a TV Display RAW images in HDR TVs And Lots More Scroll up and click the BUY Button to get this book in your Library
