Videojournalism is a new field that has grown out of traditional print photojournalism, slideshows that combine sound and pictures, public radio, documentary filmmaking and the best of television news features. This amalgam of traditions has emerged to serve the Internet's voracious appetite for video stories. Videojournalism is written for the new generation of "backpack" journalists. The solo videojournalist must find a riveting story; gain access to charismatic characters who can tell their own tales; shoot candid clips; expertly interview the players; record clear, clean sound; write a script with pizzazz; and, finally, edit the material into a piece worthy of five minutes of a viewer's attention. Videojournalism addresses all of these challenges, and more - never losing sight of the main point: telling a great story. This book, based on extensive interviews with professionals in the field, is for anyone learning how to master the art and craft of telling real short-form stories with words, sound and pictures for the Web or television. The opening chapters cover the foundations of multimedia storytelling, and the book progresses to the techniques required to shoot professional video, and record high

quality sound and market the resulting product. Videojournalism also has its own website - go to just one URL and find all the stories mentioned in the book. You also will find various "how-to" videos on the site. To keep up with the latest changes in the field such as new cameras, new books, new stories or editing software, check the site regularly and "like" www.facebook.com/KobreGuide.

Swedish designers are noted for producing distinctive and elegant forms; their furniture and household goods have an especially loyal following around the world. Design in Sweden has more than just an aesthetic component, however. Since at least the late nineteenth century, Swedish politicians and social planners have viewed design as a means for advocating and enacting social change and pushing for a more egalitarian social organization. In this book, Keith M. Murphy examines the special relationship between politics and design in Sweden, revealing in particular the cultural meanings this relationship holds for Swedish society. Over the course of fourteen months of research in Stockholm and at other sites, Murphy conducted in-depth interviews with various players involved in the Swedish design industry—designers, design instructors, government officials, artists, and curators—and observed several different design collectives in action. He found that for Swedes design is never socially or politically neutral. Even for common objects like furniture and other household goods, design can be labeled "responsible," "democratic," or "ethical"—descriptors that all neatly resonate with the traditional moral

tones of Swedish social democracy. Murphy also considers the example of Ikea and its power to politicize perceptions of the everyday world. More broadly, his book serves as a model for an anthropological approach to the study of design practice, one that accounts for the various ways in which order is purposefully and meaningfully imposed by designers on the domains of human life, and the consequences those impositions have on the social worlds in which they are embedded.
