With its fittingly dramatic design, Courbet and the Modern Landscape accompanies the first major museum exhibition specifically to address Gustave Courbet's extraordinary achievement in landscape painting. Many of these carefully selected works produced from 1855 to 1876--gathered from Asia, Europe, and North America--will be new to readers. The catalogue--which accompanies an exhibition at the Getty Museum to be held from February 21 to May 14, 2006--highlights the artist's expressive responses to the natural environment. Essays by the curators examine Courbet's distinctly modern practice of landscape painting. Mary Morton's essay situates his landscapes in relation to his work in other genres, his critical reputation, and his role in establishing a new pictorial language for landscape painting. Charlotte Eyerman's essay investigates how later generations of nineteenth- and twentieth-century artists responded to Courbet's example. The catalogue also includes an essay by Dominique de Font-Reaulx, curator of photographs at the Musee d'Orsay, on the relationship between Courbet's work and landscape photography of the 1850s and 1860s. ### **Canon Rebel EOS T8i/850D User Manual for the Elderly**

This book traces the origins of a faith--perhaps the faith of the century. Modern revolutionaries are believers, no less committed and intense than were Christians or Muslims of an earlier era. What is new is the belief that a perfect secular order will emerge from forcible overthrow of traditional authority. This inherently implausible idea energized Europe in the nineteenth century, and became the most pronounced ideological export of the West to the rest of the world in the twentieth century. Billington is interested in revolutionaries--the innovative creators of a new tradition. His historical frame extends from the waning of the French Revolution in the late eighteenth century to the beginnings of the Russian Revolution in the early twentieth century. The theater was Europe of the industrial era; the main stage was the journalistic offices within great cities such as Paris, Berlin, London, and St. Petersburg. Billington claims with considerable evidence that revolutionary ideologies were shaped as much by the occultism and proto-romanticism of Germany as the critical rationalism of the French Enlightenment. The conversion of social theory to political practice was essentially the work of three Russian revolutions: in 1905, March 1917, and November 1917. Events in the outer rim of the European world brought discussions about revolution out of the school rooms and press rooms of Paris and Berlin into the halls of power. Despite his hard realism about the adverse practical consequences of revolutionary dogma, Billington appreciates the identity of its best sponsors, people who preached social justice transcending traditional national, ethnic, and gender boundaries. When this book originally appeared The New Republic hailed it as "remarkable, learned and lively," while The New Yorker noted that Billington "pays great attention to the lives and emotions of

individuals and this makes his book absorbing." It is an invaluable work of history and contribution to our understanding of political life.
