Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters. Increasing numbers of ecologists and conservation biologists have begun to explore the use of drone technology to obtain accurate and up-to-date data on the distribution and density of species, as well as the threats to their habitats, in their ongoing attempts to conserve and monitor biodiversity. Conservation drones are low-cost, autonomous, and operator-friendly unmanned aerial vehicles that can be used for surveying, mapping, and monitoring both habitat and biodiversity. They are fast becoming a valuable complement to ground-based surveys and satellite imagery for a wide range of ecological and conservation applications. The authors pioneered the use of conservation drones for the purpose of monitoring orangutan populations in Southeast Asia. They subsequently founded ConservationDrones.org to share their knowledge of building and using drones with colleagues in the wider environmental community. This website has proved highly popular and this book aims to further build capacity to use drones and inspire others to adapt emerging technologies for practical conservation.

Most English legal texts before 1600, and many from the seventeenth century are written in law French, a dialect which differs considerably both from current French and from old Norman French. Only two guides to law French were published, one in 1701 and the other in 1779: both were full of errors and omissions. This current manual is a revised and considerably enlarged version of the first edition which was published in 1779, the first law French manual to appear since the eighteenth century. The manual is the only current guide to the law French used in English law books between the thirteenth and seventeenth centuries, an essential reference tool for law libraries, students and practitioners of English legal history. This manual is a revised and considerably enlarged version of the 1979 edition. La Pastoral de la Salud es una de las acciones evangelizadoras más significativas, porque es Jesús mismo el que se hace presente haciendo suya la condición del enfermo. La entrega amorosa que nos salva sigue realizándose cada

día en las circunstancias frágiles de nuestra condición humana que la enfermedad hace evidente. Jesús crucificado, muerto y resucitado, es la respuesta al sin sentido de los signos de la muerte y nos comunica la esperanza que no se rompe.

"The international world of states and their modern system is a literary realm," writes Charles Hill in this powerful work on the practice of international relations. "It is where the greatest issues of the human condition are played out." A distinguished lifelong diplomat and educator, Hill aims to revive the ancient tradition of statecraft as practiced by humane and broadly educated men and women. Through lucid and compelling discussions of classic literary works from Homer to Rushdie, *Grand Strategies* represents a merger of literature and

international relations, inspired by the conviction that "a grand strategist . . . needs to be immersed in classic texts from Sun Tzu to Thucydides to George Kennan, to gain real-world experience through internships in the realms of statecraft, and to bring this learning and experience to bear on contemporary issues." This fascinating and engaging introduction to the basic concepts of the international order not only defines what it is to build a civil society through diplomacy, justice, and lawful governance but also describes how these ideas emerge from and reflect human nature.
