This must-read for lovers of Stephen King's *The Shining* will leave readers breathless as Seda and her family find themselves at the mercy of a murderer in an isolated and snowbound hotel. Get ready for what Kirkus calls "A bloody, wonderfully creepy scare ride." When her mom inherits an old, crumbling mansion, Seda's almost excited to spend the summer there. The grounds are beautiful and it's fun to

explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice

but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the snow continues to fall, what Seda fears most is about to become her reality...

A single volume that gathers together three of the most remarkable novels from Jean Echenoz, the “most distinctive French voice of his generation” (The

Washington Post), Three by Echenoz demonstrates the award-winning author’s extraordinary versatility and elegant yet playful style at its finest. “A parodic thriller sparkling with wit” (L’Humanité), Big Blondes probes our universal obsession with fame as a television documentary producer tries to track down a renowned singer who has mysteriously disappeared. A darkly comedic, noir-style tour de force, it finally answers the age-old question: do blondes have more fun? “Fluid, never

forced...like a garment that fits beautifully even inside-out” (Elle), Piano brings Dante’s Inferno to contemporary Paris, following Max Delmarc, a concert pianist suffering from paralyzing stage fright and alcoholism, as he meets his untimely death and descends through purgatory—part luxury hotel, part minimum-security prison—into a modern vision of hell. Running is “a small wonder of writing and humanity” (L’Express)—a portrait of the legendary Czech athlete Emil Zátopek,

who became a national hero, winning three gold medals at the 1952 Helsinki Olympics even as he was compelled to face the unyielding realities of life under an authoritarian regime.

[Windows 2000 Active Directory](#) Thieme Jarvis Langton is an unborn-again Christian living on the fringe. He's not big on life and has tried to finish his own twice.

Still, most mornings, he quite likes to sun himself at Sydney's Royal Botanic Gardens. One morning he notices something winking at him from a nearby bush. When he investigates he finds the dead body of his friend, Lady; a Thai transvestite. Jarvis is not someone with his thoughts lined up in any reasonable order. It takes him a while to work out Lady must have been murdered. It takes him longer to decide he's going to find her killer - but once he does, the premonition that finding Lady's murderer will bring him his own end, happens in an instant. This cutting edge collection of new and previously published articles by philosophers and social scientists addresses just what it means to invoke causal mechanisms, or powers, in the context of offering a causal explanation. A unique collection, it offers the reader various disciplinary and interdisciplinary divides, helping to stake out a new, neo-Aristotelian position within contemporary debate.

In the history of mankind, three revolutions which impact the human life are tool-making revolution, agricultural revolution and industrial revolution. They have transformed not only the economy and civilization but the overall development of the human society. Probably, intelligence revolution is the next revolution, which the society will perceive in the next 10 years. ICCD-2014 covers all dimensions of intelligent sciences, i.e. Intelligent Computing, Intelligent Communication and Intelligent Devices. This volume covers contributions from Intelligent Computing, areas such as Intelligent and Distributed

Computing, Intelligent Grid & Cloud Computing, Internet of Things, Soft Computing and Engineering Applications, Data Mining and Knowledge discovery, Semantic and Web Technology, and Bio-Informatics. This volume also covers paper from Intelligent Device areas such as Embedded Systems, RFID, VLSI Design & Electronic Devices, Analog and Mixed-Signal IC Design and Testing, Solar Cells and Photonics, Nano Devices and Intelligent Robotics.

Momo Traders features extensive interviews with ten top

day traders and swing traders who find stocks that move and capitalize on that momentum. They began where you are and now make a great living--some even becoming rich. They weren't given a leg up, they didn't start with millions, and they don't manage billion-dollar hedge funds. They battle the market day in and day out just like you--and win! Hear in their own words, how they got started, what strategies they employ, how they deal with losing streaks, what setups are most profitable, how they overcome blowups, what tools they use, how they enter trades, how they exit trades,

how they manage risk, how they maintain success, and much, much more. From the swing-set builder trading with credit card advances to the penny-stock trader outwitting market makers to the accountant funding trading accounts with cash his employer gave him to pay for his MBA, these Momo Traders have figured out what it takes to beat the market. Foreword by Brett Steenbarger, Trading Psychologist and Author of The Daily Trading Coach. The first practical guide to linking
business strategy with the art and
science of user experience and
online design With fewer and fewer
companies vying for the attention
of online consumers, it is
becoming increasingly clear that
the big winners in the E-business
arena are those that practice
customer-centric design. While
there are a multitude of good
books on the art and science of

user interface and website design, until Built For Use, there were none that focused on user experience from the corporate strategist's and marketing manager's perspectives. Drawing upon her work as a user-experience strategist for numerous Fortune 1,000 firms, Karen Donoghue explores the dynamics of business strategy and user experience in a concise, jargon-free manner for nontechnical managers. With the help of fascinating and instructive before-and-after case studies, she helps managers become fluent in the language of user-experience; identifies user-experience and design strategy best practices; explains how to determine what customers want; and much more.
